

## Redouble Efforts To Provide Work For Jobless Men

27 States Show Big Increases in Building Contracts—Hoover Calls Meeting.

TO STUDY MEASURES  
OF PERMANENT AID

Millions of Dollars' Worth of Work Let in Contracts for September, Statements Disclose.

BY THE ASSOCIATED PRESS.

Washington, October 30.—Efforts of the administration to solve the nation's unemployment problem, interrupted by threatened railroad strikes, are being redoubled, officials declared tonight. Secretary Hoover officially is expected to call a meeting next week of the standing committee of the national conference of unemployment, to begin the study of the phases of the question in line with the perfection of permanent measures for insuring work for the wage earners.

Studies carried on by this committee, officials asserted, would be designed to prevent sharp variations in the country's employment curve over a period of years by suggesting methods for spreading work equally over the lean and the fat years.

In connection with the recommendation of the conference to increase employment through public works, Secretary Hoover made public reports from the 27 states comprising the northeastern section of the country showing the award of more building contracts in September than in any other month this year, or any September on record. The amount was 11.5 per cent greater than in August, the statement said, while during the past ten years September building contracts have averaged 14.5 per cent less than in August. Comprehensive statistics have been collected by the conference, Mr. Hoover said.

Contemplated Projects.

Contemplated projects for September in the 27 northeastern states, the report said, amounted to 10,455, with valuation of \$218,030,600. Actual building contracts awarded were 8,144, with valuation of \$246,185,800. From January 1 to October 1, of this year, 57,956 contracts were awarded, valued at \$1,746,759,300. Of this amount, \$599,182,100 was for residential buildings, \$369,813,700 for public works and public utilities, \$254,237,500 for business buildings, \$186,874,700 for educational buildings and \$122,553,900 for industrial buildings.

Summarized statistics from the six districts in the report follow: Boston district (New England states) contemplated projects, 1,400; contracts awarded, 1,237; value, \$23,570,000. New York district (New York state and northern New Jersey), contemplated, 2,536; value, \$73,255,200; contracts, 1,947; value, \$59,986,000. Philadelphia district (eastern Pennsylvania, southern New Jersey, Maryland, Delaware, District of Columbia, Virginia, North Carolina and South Carolina), contemplated, 1,739; value, \$58,232,400; contracts, 1,321; value, \$24,118,900. Pittsburgh district (western Pennsylvania, West Virginia, Ohio, Kentucky and Tennessee), contemplated, 1,264; value, \$44,005,600; contracts, 1,220; value, \$40,555,100. Chicago district (Illinois, Indiana, Iowa, Wisconsin, Michigan, Missouri and parts of eastern Kansas and Nebraska), contemplated, 2,757; value, \$106,484,800; contracts, 2,022; value, \$88,123,400. Minneapolis district (Minnesota and North and South Dakota), contemplated, 751; value, \$13,634,100; contracts, 501; value, \$7,015,500.

Half Not Contracted.

"Approximately half of the building projects contemplated for 1921 in twenty-five northeastern states were not contracted," the report explained.

"In educational buildings, hospitals and institutions made progress and public works and utilities, there were 15,700 projects contemplated, at a cost of \$1,676,847,798, and only 9,556 of these enterprises costing \$812,334,130 were contracted."

"If some of these projects that were planned for last year could be rushed at this time, it would help materially in providing jobs for the nation's four million men who are out of work," the conference members believe."

**PROJECT STARTED  
TO MOVE CAPITAL  
OF LOUISIANA**

Baton Rouge, La., October 30.—A serious project, aimed at the backing of a large number of the lawmakers, has been launched in the legislature for the removal of the state capital from Baton Rouge to New Orleans. Representative R. L. Williams, of Bienville parish, sponsors the project, and has been active for several days among the various legislative groups.

The transfer measure, according to the formal notice served upon the present session, will not be introduced until the regular legislative session next May. It provides for a referendum vote and makes provision to pay for the new capital, if the election carries, out of money from the severance tax fund, which then will be available.

## CHINESE ENVOYS TO ARMS PARLEY REACH CAPITAL

Delegation of More Than Ninety Given Ovation as It Arrives in Washington.

U. S. NEGOTIATORS  
WILL MEET TODAY

M. T. Liang Heads Chinese Party—Was Educated in U. S. Along Modern Lines.

Washington, October 30.—China's advance guard to the Washington conference on Pacific and Far Eastern questions to be held in connection with discussions on limitation of world armament, arrived tonight. The more than 90 members of the party were received by government officials representing the state department, the army and navy and the general public by the crowds assembled to greet them.

The Chinese delegation was the second official body to reach the national capital in response to President Harding's invitation to participate in the discussion by nine nations of Pacific and Far Eastern problems, the first Japanese detachment having arrived last Sunday. Others are scheduled to arrive this week and state department officials charged with responsibility of conference arrangements are confident that each of the national delegations will be organized and ready for work well in advance of the opening session on November 12.

**Held Session Today.**

The American delegates will hold their first preliminary session at the state department tomorrow and Secretary Hughes, chairman of that group, has indicated that gratifying progress has been made both in study and preparation of important data relating to this government's position and conference treatment of the question it was called to consider.

Tonight's arrivals were greeted with cheers by thousands who had assembled early in the evening at the union station and waited impatiently for the special train from the Pacific coast which was delayed several hours past the time first set for arrival.

After formal exchanges of courtesies, between the Chinese and American officials, the playing of national anthems, by the military band, the visitors were escorted by cavalry troops through the city to their respective residences, the Chinese legation and hotel apartments. Crowds lined the streets, applauding the delegates, who in turn responded with friendly salutations.

**Liang Heads Delegation.**

Liang Ju-Hao, better known in the United States as M. T. Liang, headed the delegation with the official designation of "advisor." Also prominent among the delegates were Vice Admiral Tsai Ting-Kan and Lo Wen-Kan, an associated advisor, and Chung Mun-Yew, counselor of the delegation, the principal members of which will arrive later. All four of these officials were educated in the United States or England, M. T. Liang being one of the first Chinese students to come to the United States for modern education and instruction.

The party was met at the union station by Robert Wood Bliss, third assistant secretary of state, and other officials of the state department, by Rear Admiral C. M. Williams, and other officers, representing the navy, and by Brigadier General Brewster and other officers for the army.

**THREATS MADE  
AGAINST CROWDER  
BY SYNDICALISTS**

Havana, October 30.—Threats against Major General Enoch H. Crowder and the United States legation in Havana are contained in a proclamation distributed here in connection with the Sacco-Vanzetti case. The posters denounce General Crowder as a "representative of the American bourgeoisie" and threaten "the dagger of vengeance" against the Americans.

The police, however, are taking prompt action. Last night they arrested ten persons at the headquarters of a syndicalist labor organization. A number of terrorist proclamations were found on the premises. Other arrests are expected.

**Monarch's Body Moved**

Berlin, October 30.—The body of former King Ludwig of Bavaria, who died at Sarav castle, Hungary, is being moved to Munich, where the burial will be held in the Church of Our Lady at noon on Saturday, November 5. Funeral services for the former queen of Bavaria will be held at the same time.

## MELLON REFUSES PLEA TO EXPAND CURRENCY OF U. S.

If Government Were to Pump Money Into Circulation, Results Would Be Unfortunate, He Says.

LETTER IS IN ANSWER  
TO GEORGE M. TRAYLOR

Mellon Also Opposes Reduction to Three Per Cent of Discount Rates of Federal Reserve Bank.

No additional legal tender notes should be placed in circulation by the government at this time, and if the government were to issue fiat money or else pump money into circulation in excess of business requirements, unfortunate results would be produced, in the opinion of Secretary of the Treasury A. W. Mellon.

Further, the discount rates of federal reserve banks should not be reduced to three per cent, as such a rate of discount would so restrict the activities of the federal reserve banks as to defeat the very purpose for which they were organized, according to Secretary Mellon.

This position of the head of the treasury department of the United States was disclosed in correspondence passing between the secretary and George M. Traylor, prominent capitalist of Atlanta. Mr. Traylor has just made public copies of letters he wrote to President Harding and Secretary Mellon and the reply which he received from the secretary of the treasury covering the points he raised and the suggestions he made.

**Additional Notes.**

Mr. Traylor first wrote President Harding and the president turned the letter over to Secretary Mellon. In his first letter Mr. Traylor, among other things, suggested that additional legal tender notes be issued by the government and that these notes be offered to holders of government bonds at par. He made general recommendations for expansion of the currency at this time. In addition to these suggestions Mr. Traylor wrote that a maximum discount rate of 3 per cent should apply to all federal reserve banks and set forth his views supporting this position.

After expressing his firm belief in the gold standard, Mr. Traylor, in his letter, declares the government, having an absolute monopoly of issuing paper money, should furnish a sufficient volume of it to "insure the comfortable transaction of all legitimate business and to prevent extortionate rates of interest."

"Ninety-five per cent of the people of this government are borrowers and the borrower is not the government," Mr. Traylor wrote. "Suggesting that this country should have national banking law."

## ROBBERS ESCAPE FROM FUR STORE

Policeman Owen Empties Revolver After Fleeing Thieves—\$4,000 Loss Reported.

Approximately \$4,000 worth of furs was stolen from the establishment of P. L. Pines & Milner, furriers, 217 Peachtree street, by two white men who broke into the store at 3:30 o'clock Sunday morning, according to statements by the proprietor to police.

Patrolman W. E. Owen, upon whose beat the robbery occurred, stated that he saw two men leaving the store, and chased them two blocks. He emptied his revolver at them, he said, but both escaped.

This robbery follows the robbery several weeks ago of the Lorene Fur store on Peachtree street, from which \$7,000 worth of furs were reported stolen. Mrs. McWhorter, proprietor of the store, left the city Saturday afternoon for Chattanooga, accompanied by Detective Gillespie, upon receipt of information by police that two men, E. E. Davis and S. B. Cavley, had been arrested by Chattanooga police in connection with the robbery of the fur store.

From Chattanooga, Mrs. McWhorter, with Detective Gillespie and two prisoners will go to Birmingham, Ala., where the two men are expected to identify the men to whom they disposed of the furs. They are said to have confessed to the robbery, and indicated their willingness to implicate the persons who received the furs.

I. Pines, from whose establishment the furs were stolen Sunday morning, was about a year ago the victim of bandits, who lured him to a lonely place on Peachtree road, persuading him to accompany them in an automobile, bringing a valise of furs with him, to make a supposed sale. He was robbed of his furs at the point of a pistol, and compelled to walk back to the city.

## Atlanta Girl Saves Friend From Death in Waikiki Surf

Miss Clara Benbow (standing), Atlanta girl who saved her companion, Miss Ruth Rigby, also of Atlanta, from drowning in the surf at Waikiki beach, Hawaii.

The story of how one Atlanta girl saved another girl from drowning while both were bathing in the surf at the famous beach of Waikiki, near Honolulu, Hawaii, was disclosed with the return of the young women to Atlanta during the week. The heroism of the tale is Miss Clara Benbow, 164 Ponce de Leon avenue, and the rescued girl is Miss Ruth Rigby, of 169 Angier avenue.

The young women, during a month's stay in Hawaii, were bathing in the surf at the famous beach

when Miss Rigby attempted to ride a Hawaiian surf board in Kanaka fashion, without holding to the sides. She paddled out beyond the breakers and tried to stand up on the board. A heavy wave caught her and swept her from the board. Miss Benbow saw Miss Rigby's plight and, abandoning her own surf board, she managed to reach Miss Rigby and to assist her to safety.

Miss Benbow is the daughter of L. S. Benbow, an attorney of Greensboro, N. C., but she now lives in Atlanta.

**Notables Arrive  
In Kansas City  
For Legion Meet**

Doughboys Take Diaz and Jacques to Their Hearts as Legionnaires.

Kansas City, Mo., October 30.—The buck private advance guard to the third annual convention of the American Legion has added two recruits to its ranks.

One is General Armando Diaz, commander-in-chief of the Italian army, and the other is Lieutenant General Jacques, chief of the dauntless little Belgian army.

They were given hearty welcomes when they arrived. A crowd of 100,000 cheered wildly, bands played, national anthems, American, Italian and Belgian were sung, and the two recruits seemed to like it.

General Jacques saluted formally when welcomed by the American Legion committee, and then grinned and waved his hand very cheerfully to the thousands of the area.

The prevailing belief of the area is that a breakdown in the negotiations now seems to depend almost entirely on the willingness of the Ulster authorities to assist in coming into line with the Sinn Fein.

Sir James Craig, the Ulster premier, who has professed a desire to work amicably with southern Ireland, in an all-Ireland council, will, it is said, be offered greatly extended powers for the northern parliament, accompanied by a strengthening of the position of the central council connecting the two Irish parliaments, and it is declared to be the belief that he may accept this.

But, it is asserted, Sir James will oppose the conference convening in the northern parliament and will especially resist any cutting off of the representation of northeast Ulster in the imperial parliament which he regards as the greatest safeguard of Ulster.

The prevailing belief here seems to be in various quarters that even should there be a breakdown in the present conference the truce in Ireland should continue.

The Observer today urges that there be a definite continuance of the truce for three months, during which time, it declares, Premier Lloyd-George might go to Washington and discussions at home might bring about a settlement of the Irish situation. The newspaper adds that the Sinn Fein most likely would not object to this expedient as "the truce so far has strengthened their position, and its only opponents would be the rebellious unionist communers, the premier expects to defeat overwhelmingly in Monday's decision in the house of commons."

**ENORMOUS ISSUE  
OF SOVIET PAPER  
IS DISTRIBUTED**

Moscow, October 30.—(By the Associated Press.)—Paper money reaching the enormous total of 5,050,000,000 rubles has been issued by the soviet government, the latest output being 150,000,000 rubles in new money for the opening of the national bank.

The city soviet has published an order permitting newspapers to publish advertisements, which has been absent from the columns of journals here for four years. Advertisements have been taxed heavily.

**TELL EXPERIENCES  
AT PRISON MEET  
IN FIGHTING CRIME**

Jacksonville, Fla., October 30.—Members of the American Prison Association, in annual convention, tonight detailed experiences in combating crime and forecast dire results if delinquency and crime-breeding situations are not curbed. Governor Warren T. McRay, of Indiana, delivered an address on "The Human Harvest." A general session also was held with the chaplains' association, an auxiliary organization, in charge.

## BRITISH PEOPLE, WEARY OF STRIFE, LOOK TO PARLEY

England Shows Little Excitement, But Places Deepest Hopes in Washington Meet.

WOULD MINIMIZE  
ARMAMENT ANGLE

Government Contends Forces Are as Low as Possible for the United Kingdom's Safety.

BY RALPH H. TURNER.

United News Staff Correspondent. London, October 30.—England, trained by tradition to conceal any feelings of undue emotion, views the Washington conference with no more enthusiasm than England views any other event in the cycle of world's history. England, plainly, is not "excited" nor "worked up" over any prospects of a new era dawning for conversations scheduled in Washington.

But England, contrary to first impressions, is not indifferent to the Washington meeting. The British government, in its own quiet way, is following intently and expertly every angle of world affairs which has the slightest bearing on President Harding's conference to consider limitation of armaments and a settlement of the Pacific crisis.

**Manifest Deep Hopes.**

And the English people, in an equally quiet but none the less effective way, are manifesting the deepest hopes that from Washington will emerge a more certain agreement for preventing the "next war" and reducing the tax burden that maintain big armaments. Not only are the British people weary of war; their backs are bent under the load of taxation and they are hoping fervently that a way out will be discovered by the statesmen who assemble at Washington.

As for the government, officially speaking, it tends rather to minimize the armament angle of the Washington conference and to rivet its attention on the problems of the Pacific ocean and the Far East.

Limitation of armament, it is argued here, already has been put into effect by the British government. While the government is about to let contracts for four new battleships, it is understood that a clause will be inserted to permit cancellation of the contracts at any period of their construction, as a precautionary measure if the Washington conference is successful in its object.

The government also maintains that the British land forces, both at home and in the colonies, have been reduced to the lowest possible minimum.

**Concern Over Far East.**

So it is to the Far East that British officialdom turns with more concern, fearing that the situation there possesses the most dangerous possibilities and hoping that an agreement to preserve the peace in the Pacific will be found. In a delicate position because of her alliance with Japan, Britain fears that her attitude may be misunderstood.

English statesmen avoid frankly that they cannot "throw Japan over," and hope that the United States will not expect such action. The British fear that the American press and public, if not the administration, are adopting a hostile attitude toward the Japanese which may prejudice the success of the meeting.

The views held by the dominions toward Japan and the Anglo-Japanese alliance heighten the difficulty of Downing street's position.

The British hope, therefore, that the conference will result in a broader agreement by America, England, Japan, and the British dominions—but they emphatically point out that they cannot afford Japan by cancelling the alliance with nothing to take its place.

But skepticism is evident. Idealists are at a discount over here and there is considerable doubt whether America is ready yet to assume a full and responsible role in the co-operative management of world affairs.

**Thousands Attend  
Peace Monument  
Exercises Sunday**

Big Parade Precedes Eleven Anniversary of Unveiling of Statue.

Unmarred by a hitch in the program of any kind the re-dedication exercises under the auspices of the Old Guard of Atlanta marking the eleventh anniversary of the unveiling of the Peace monument in Piedmont park were held Sunday afternoon with upward of 5,000 people participating. The dedicatory ceremonies were held on the large steps leading down from the Peace monument and immediately after were before the military organizations participating passed in review before Governor Thomas W. Hardwick and prominent citizens who stood with him in the reviewing stand.

Three-fold in purpose the ceremonies marked the celebration of the anniversary of the unveiling of the monument, the dedication of the monument, and the re-dedication of the monument.

**U. S. Veterans' Aid  
Efforts Attacked  
By Senate Board**

Inexcusable Delays, Red Tape and Incompetency Are Charged by Probe Committee.

WILL SUBMIT BILLS  
TO CORRECT DEFECTS

"Lamentable Failure" by Government to Provide Suitable Hospitals, Alleged by Board.

Washington, October 30.—Government treatment of war veterans, as regards hospitalization, vocational training, and the handling of insurance and compensation, is sharply criticized in the second report of the senate's committee which investigated soldier relief.

Inexcusable delays, red tape and incompetency were charged in connection with vocational training. Hospital facilities, in many instances, are said to have been inadequate, and unsuitable for providing proper care. The war risk bureau is accused of slowness.

The committee declared its intention of submitting legislation to correct the defects which it believes it has discovered. Belief was expressed, however, that some of them would be remedied through the consolidation of the various agencies under one administration, the United States veterans' bureau.

**Lamentable Failure.**

"There is no doubt that there has been a lamentable failure on the part of the government to provide adequately for the special problems of tuberculosis and neuropsychiatry, which, together, now constitute two-thirds of the load. The use of the miserable war-camp type, poorly located, which should never have been used for other than temporary purposes."

"Thousands of men are still receiving hospital treatment in such places."

"There has been a failure to provide adequately for the special problems of tuberculosis and neuropsychiatry, which, together, now constitute two-thirds of the load. The use of the miserable war-camp type, poorly located, which should never have been used for other than temporary purposes."

"The systems of transferring patients, the committee holds, has been a detriment, and an expense."

**Patients Are Dying.**

"The knowledge of the government's failure has prevented men who required hospitalization from seeking it until too late; and a stream of dying men, beyond the possibility of cure, is in part the result thereof."

"Moreover, the administration of such hospitals as were available has in some respects been defective. The lack of inspection for venereal disease, the failure to prevent the use of drugs and liquor in hospitals, and this lack of discipline have all had their evil effect."

Vocational training work, the committee said, was "very slow in getting started." The "rehabilitation" and given training is called a "poor showing, considering the sums expended."

"The delays were inexcusable," said the report, adding that reforms now effected lead to the hope for better results.

Among the recommendations for legislation is that the director of the veterans' bureau be authorized to provide additional hospital facilities at a cost of \$15,000,000, and that the sums be made available at once.

**Veteran Financier Dies.**

Baltimore, October 30.—Christopher C. Shriver, veteran financier and president of the Metropolitan Savings bank, died today aged 81. He had been connected with the Metropolitan bank since its foundation, 1867, and had been its head since 1888. He was one of the first bank officers to introduce certified public accountancy.

**The Weather**

Washington, October 30.—Forecast: Georgia: Rain Monday, probably followed by clearing Tuesday; not much change in temperature.

Virginia: Rain Monday and Tuesday; unsettled; not much change in temperature.

North and South Carolina: Rain Monday, probably followed by clearing Tuesday; not much change in temperature.

Florida: Local rains Monday; Tuesday generally fair.

Extreme northwest Florida: Unsettled Monday, probably local rains; Tuesday fair, not much change in temperature.

Alabama: Unsettled Monday, possibly local rains in east portion; Tuesday in south portion Monday; Tuesday fair.

Mississippi: Generally fair Monday and Tuesday; cooler in south-east portion Monday.

Tennessee and Kentucky: Unsettled Monday, probably local rains in east; Tuesday fair, not much change in temperature.

# CHARLES' SURRENDER DEMANDED BY POWERS

Budapest, October 29.—(By the Associated Press.)—What is declared to be an ultimatum was delivered today to the Hungarian government by representatives of Great Britain, France and Italy in behalf of the little entente, demanding that Charles be handed over to the commander of the British squadron and immediate expulsion asked.

At the same time representatives of the little entente notified the foreign ministry that if the ultimatum was not obeyed without delay Hungary alone would be responsible for the inevitable and serious consequences.

Representatives of the powers handed to Foreign Minister Banffy a note today from the ambassador's council, expressing satisfaction at the Hungarian government's firmness in preventing the entry of Charles into the capital and his restoration to the throne, which threatened central Europe's peace a second time. The note invited the Hungarian government to place Charles in the hands of the British squadron, and recalled the urgency of the government proclaiming his detention.

World Eliminate House. Representatives of the little entente insisted verbally to the foreign minister that the government take immediate measures to eliminate the house of Hapsburg; otherwise the gravest consequences might result for Hungary.

Whether or not former King Charles will sign a writ of abdication is the great question prevailing in Hungary. Negotiations are at present being carried on with him at Thany in an endeavor to have him renounce his claims to the throne in the interest of the country.

The feeling here is that if Charles

# 20 ARE INJURED WHEN FAST TRAIN CARS QUIT TRACK

Chicago, October 30.—Twenty passengers were injured, three of them seriously, when two cars of the Duluth-Chicago express were derailed here Sunday.

Those badly hurt are J. H. Oreck, assistant; H. A. Starkey, board of trade member; and Katherine Dickinson, stenographer, all of Duluth.

When the train left the rails it traveled several hundred yards before stopping on the edge of a 30-foot embankment.

## ASK PUBLIC TO PASS ON CASE OF ITALIANS

Boston, October 30.—A statement asking the public to judge the guilt or innocence of Nicola Sacco and Bartolomeo Vanzetti "on the basis of evidence introduced in the courtroom and not on the basis of newspaper fabrications about the two men and their friends" was issued by the Sacco-Vanzetti defense committee today.

The committee formed soon after the arrest of the two Italians on the murder charge of which they were later convicted, is now trying to obtain a new trial for them.

The lurid plots and threats attributed to mythical individuals referred to as Sacco-Vanzetti sympathizers are so thoroughly harmful to the effort being made to save the two men from the electric chair that they could not have originated in the minds of friends," the statement said. "Either they were planted by persons desirous of putting the cause of the two prisoners into disrepute or they are lies pure and simple."

We ask that the newspaper apply to rumors and far-fetched theories not alone the standard of news value, but also that of common sense and human decency.

"We furthermore appeal to the people not to judge the guilt or innocence of Sacco and Vanzetti on the basis of newspaper fabrications about the two men and their friends."

## ESCAPED CONVICT CAPTURED IN CITY

David Benjamin, a negro convict, who had escaped from the White county chain gang, was captured by county policemen at W. H. Baker and Nelson streets Sunday night.

Charles Thompson, a negro convict, who escaped from the Chattahoochee county chain gang, and who was with Benjamin, made his escape, but was wounded. It is thought, by the officers, who chased him for several blocks, that he was they ran. Benjamin was lodged in Fulton tower.

## In and Around Decatur.

BY J. A. MILLS

Stabbed to Death.

Decatur, Ga., October 30.—(Special.)—Ernest Kilgore, a negro, 29, 1755 Chevington street, was stabbed to death by Oliver Howard, another negro, aged 18, at the corner of Marshall and Herring streets Sunday morning. Oliver was arrested by Sheriff J. A. McCurdy and L. B. Milam, and lodged in jail.

There were eyewitnesses to the tragedy, and no inquest will be held. It is expected that a preliminary hearing will be held Monday.

## Still Captured Near Redan.

Chief of County Police M. H. Phillips, assisted by County Policemen A. W. Rogers, L. P. Henderson and Deputy Sheriff Alonzo Robson Saturday night captured a still in full operation near Redan. They destroyed about 300 gallons of beer and 25 gallons of good whiskey.

The whiskey and still were brought to town. There is a widespread apprehension that the whiskey will be destroyed. No arrests were effected. This is the second raid in the same neighborhood within a week, the former raid occurring last Thursday.

## Important Social Event.

The writer will give a spread to the city officials and policemen of Decatur at a date to be announced at the mass meeting at the courthouse Monday night. All who have been approached have signified an intention to be present.

Headed by City Manager P. P. Pilcher, the members of the police force who will be present are W. W. Hanger, chief; J. A. Nolan, deputy; Arthur McConnell, H. M. Beattie and W. B. Fowler. Acting Fire Chief L. B. Milam will also be present, accompanied by Sheriff J. A. McCurdy.

A unique feature of the entertainment will be that the city officials will be allowed to contribute to a fund to pay all expenses, but the candidates, who are also expected to be present, will be allowed to eat all they want without expense.

There will be oratorical eruptions and it is expected that the photographers of the city papers will snap the salient features of the occasion.

# SEEK TAX IMMUNITY FOR TRADERS ABROAD

Washington, October 30.—Whether majority members of the senate finance committee will press to have reintroduced into the tax revision bill the provision exempting foreign trade corporations and foreign traders from taxation on their income from sources within the United States probably will depend upon the fate of the proposition grant exemptions to such corporations and traders doing business.

Strong opposition has developed on both the republican and democratic side to the proposition to relieve from taxation American traders in the Far East. Resolutions by Senator Smoot, author of the proposal, that it would affect few corporations or individuals brought from opponents the declaration that practically all American concerns trading with China would organize subsidiary companies to take over the income from this business.

This was a high spot in the argument of Senator La Follette, republican, Wisconsin, who led the successful fight to have stricken from the tax bill the original provision granting exemptions to foreign trade corporations and foreign traders irrespective of where their business was done. Administration officials have urged such a provision, but so many senators apparently are convinced that it would be used by the Sacco-Vanzetti defense committee today.

The committee formed soon after the arrest of the two Italians on the murder charge of which they were later convicted, is now trying to obtain a new trial for them.

The lurid plots and threats attributed to mythical individuals referred to as Sacco-Vanzetti sympathizers are so thoroughly harmful to the effort being made to save the two men from the electric chair that they could not have originated in the minds of friends," the statement said. "Either they were planted by persons desirous of putting the cause of the two prisoners into disrepute or they are lies pure and simple."

We ask that the newspaper apply to rumors and far-fetched theories not alone the standard of news value, but also that of common sense and human decency.

"We furthermore appeal to the people not to judge the guilt or innocence of Sacco and Vanzetti on the basis of newspaper fabrications about the two men and their friends."

## DEMENTED WOMAN BURNS WITH JAIL

Mobile, Ala., October 30.—The county jail at Moss Point, Miss., near here, burned tonight, and Mary Hawthorne, a demented woman, the only inmate of the place, was burned to death. The supposition is that the crazed woman set the building on fire.

## SHARING OF PROFITS BY RAILROADS URGED

Continued From First Page.

road question, both in this country and others, working out the question of government ownership. The time may not be ripe now, nor within a few months, but it will be before long.

La Follette believes also the railroad question may figure in settlement of mine disputes, because he considers the two closely allied. National agreements in the coal industry, he pointed out, expire next spring.

## HOOPER CALLS FOR TEETH IN ACT.

Chicago, October 30.—The transportation agency of some legislative body to provide against future railroad strikes, Beh W. Hooper, vice chairman of the United States railroad labor board, today asserted in an address before the men's class of a local church.

"In my judgment congress should not have perpetrated the irony of pulling the board's teeth and then telling it to go forth and bite those who interrupt traffic and strangle commerce," he said.

"In my transportation act, under which the board operates, is unique in one respect. There is no other court, tribunal or agency of the government, that does not possess the power to inflict penalties for the violation of its decisions."

"The transportation act uses the word 'shall' up to a certain point and there its mandatory provisions cease."

"It says that the carriers and employees 'shall' settle their disputes by the settlement of their disputes; that if they do not agree they 'shall' take the matter up to the railroad labor board and that the board 'shall' decide the dispute."

"Just here the law ceases to be imperative. It provides that if the board upon inquiry, finds that its decisions have been violated it 'may' make public its decision in such manner as it may determine."

"In other words, the board may point the finger of scorn at the violator and call down upon its head the denunciation of the public."

## MELLON REFUSES PLEA TO EXPAND CURRENCY

Continued From First Page.

making the maximum rate of interest 6 per cent per annum with national banks. Mr. Traylor goes further and suggests that the federal reserve banks be limited to 3 per cent discount rate.

Not Money-Making Machine. "Federal reserve banks were organized for the benefit of our people at large to prevent panics and to keep down the rate of interest—not as a money-making machine to put up the rate of interest and profiteer upon the necessities of the public," he wrote.

Mr. Traylor suggested the issue of legal tender notes based on the present rate of gold, payable or redeemable in gold, at the pleasure and convenience of the government and offer this money to holders of United States bonds, including Liberty bonds, at par for such issue of the bonds as is now being sold at the heaviest discount.

Mr. Traylor wrote that no sensible man can question the soundness of this country's money. He said the argument against the legal tender notes based on the fact that they have no fixed date for redemption is not logical for the reason that no government in the history of the world ever went out of business that paid its gold bonds or redeemed its paper currency. He declared this currency should be renewed and replenished from time to time, but never retired from circulation.

## Mr. Traylor's Views.

Discussing the question further Mr. Traylor said in his letter:

"Much is said about the government of the United States keeping out of the banking business. What the government should do is as far as practical keep out of the borrowing business, and cease as far as possible to compete with our enterprising, capable, aggressive business men for money and in this way force a high competitive rate of interest."

"Our most capable business men

# THE CONSTITUTION, ATLANTA, GA., MONDAY, OCTOBER 31, 1921.

will take the chance and borrow money ranging from 4 per cent to 6 per cent to develop the resources of our country, thereby furnishing work for laborers, bringing happiness and contentment to our citizens, and are designed to expand and interest in high and money difficult to obtain on any kind of collateral, they will not take the chances of paying this high interest, and the result is a cessation of activities culminating in idleness, stagnation and general demoralization of the people. "I know hundreds of thousands of people borrowed money to buy Liberty bonds with the assurance of the government's representatives and agents that the bonds would never be less than par if the time came when they wished to sell. "I know of a concrete case recently where enterprising business men proposed to borrow money at a reasonable rate offering to go as high as 6 1/2 per cent to be used in the development of properties. They were informed that the money could probably be had, would require a few days to hear from the parties who had the money. The reply came back that their money had been invested in the bonds of the United States at a liberal discount, so the gentleman could not get it. The paper of the government had competed for the money."

"What I wish is for the government to issue legal tender notes at the present rate of gold, at the pleasure and convenience of our government, and offer this money to the holders of the United States bonds at par for such issue of the bonds as is now being sold at the heaviest discount."

"This would insure United States bonds going immediately to par and also insure the rate of interest being lowered immediately and the United States as parties to the government would save all of the unaccrued interest on these bonds."

"I am also in favor of a law making the maximum rate of interest to be charged by the federal reserve banks to the member banks for their discount 3 per cent, and the federal reserve banks can limit interest above 5 per cent is beyond normal. Six per cent was the ruling rate throughout the country with conservative banks during the life of the Aldrich emergency currency act. The former administration issued entirely too many bonds and not enough currency."

"If the foregoing is enacted into law it will do more good to stabilize business and encourage the development of resources of our government than all of the temporizing bills combined which have been offered in the past year. The federal reserve bank should function just as the postoffice does and not as a profiteering enterprise."

## Mellon's Opposition.

In his reply to Mr. Traylor the secretary of the treasury explained his position in opposing further expansion of the currency and against the establishment of such a low discount rate as 3 per cent in the federal reserve banks.

After outlining his policies of the treasury department relative to the currency and after reviewing the purposes of the federal reserve banks and their probable policy in the future, Secretary Mellon made the statement that the gross public debt of the United States has been reduced \$2,800,000 since August, 1919, when the high point of public debt was reached. He also discussed at some length the status of Liberty bonds and explained why these bonds are not bringing par value when placed on sale.

Following is the letter of Secretary Mellon to Mr. Traylor:

"Dear Sir: I have received your letter of August 16 with the inclosed copy of your letter of August 8 to the president, suggesting that the government should put into circulation additional issues of legal tender notes, and further suggesting that a law should be passed making 3 per cent the maximum rate of discount of federal reserve banks."

"The volume of money in circula-

# tion at present is amply sufficient to meet the demands of business, and the currency needs of the country are fully provided for under the existing system, particularly through the issue of federal reserve notes, which are designed to expand and contract in accordance with the demands of trade. The federal reserve banks stand ready at all times to issue federal reserve notes on the proper security as they may be necessary to meet the country's requirements, so that a shortage of currency under the present system is almost impossible.

"For the government to issue fiat money, or even to pump money into circulation in excess of business requirements, would produce most unfortunate results. As you know, the present reaction in prices and business activity in this country and throughout the world followed a period of rapid expansion of credit and currency. An abnormal expansion of credit and currency is usually accompanied by inflated prices and followed by a period of falling prices and depression in business. Additional issues of notes pumped into circulation now, as you suggest, would result in inflation similar to that of 1919 and the early part of 1920. Then would follow the inevitable reaction and business conditions would be still further upset."

"There is nothing to be gained, and everything to lose, by large issues of government currency or notes such as you propose. Several of the countries of Europe present striking examples of the effects of such a policy. The conditions from which this country has been suffering are world-wide in scope, and are due, in large measure, to the destruction and waste of war. The world is now suffering from any form of currency or credit. On the contrary, credits have been greatly expanded since the beginning of the war period, and there has been widespread inflation of currencies. There is, of course, a great shortage of capital, but this shortage can be made good only by the development of productive enterprise and the promotion of saving. It can not be cured by issues of paper currency by governments. That is an effort to create something out of nothing, and every such effort sooner or later leads to disaster."

Out of Question. "In view of your suggestion of a maximum discount rate for the federal reserve banks, I am inclosing a copy of a letter of Governor Harding, of the federal reserve board, to the chairman of the committee on banking and currency of the United States senate, under date of December 17, 1920, with reference to that question. A maximum discount rate of 3 per cent for the federal reserve banks as you suggest, is entirely out of the question. It would so restrict the activities of the reserve banks as to defeat the very purpose for which they were organized."

"You state that 3 per cent is all the member banks can afford to pay, and furnish their patrons with money at 6 per cent. I would call your attention to the fact that commercial banks are not primarily borrowing institutions, they are lenders, and for them to borrow in order to lend at a profit is universally recognized as an unsound practice. Their profits should be made on their own resources. The primary purpose of a reserve institution is to assist commercial banks in times of unusual or emergency demands rather than to extend a permanent line of credit on which the member banks can make profits."

"You say that the federal reserve banks are profiteers because of their high discount rates. The discount rates of federal reserve banks, however, are not fixed with the idea of making profits for the federal reserve banks, but with the idea of representing normal supply and demand of credit. Profits are incidental to their operations, and it would indeed be unfortunate if this element should influence the proper administration of the reserve banks. The reserve banks pay dividends of only 6 per cent per annum, and all

earnings, after deducting operating expenses, the 6 per cent dividend and a certain amount which is set aside as surplus, are paid to the government as a franchise tax. There is, therefore, no motive for the reserve banks to make large earnings for the sake of profits."

Public Debt Reduced. "In view of your statement that the government should keep out of the borrowing business, you will doubtless be interested to know that the gross public debt of the United States instead of increasing has been reduced \$2,800,000 since August, 1919, when the high point for the public debt was reached."

"I can not agree with your statement that the people purchased Liberty bonds with the assurance from the government's representatives and agents that the bonds would never be less than par if the time came when they wished to sell them. These bonds were sold with definite maturities and interest rates, but with no commitment or statement on the part of the treasury as to their market value, and the United States is under no obligations to guarantee the holders of Liberty bonds and Victory notes against fluctuations in money market conditions or to guarantee a market at par for the bonds. Liberty bonds have been selling below par in the market largely because the war and conditions prevailing after the war resulted in a worldwide shortage of capital which greatly increased the price of money. In fact, all types of securities with fixed interest rates are declined because of the shortage of capital and consequent high interest rates, and the fact that Liberty bonds are selling below par is not due to any fault of the government or to any defect in the bonds themselves. It is merely a reflection of market conditions of money, and

with the gradual accumulation of capital and consequent lower money rates, the market prices of Liberty bonds and Victory notes should gradually appreciate in accordance with inexorable economic law."

"Very truly yours,  
"A. W. MELLON,  
Secretary."

"August 22, 1921."

## Holds to His Views.

In replying to the letter of Secretary Mellon, Mr. Traylor holds to his views as to the need of issuing legal tender notes to take up the issue of bonds in question.

"If the government issued these legal tender notes to take up bonds they would not be increasing their liabilities or outstanding obligations but would be decreasing them by the amount of the unearned increment," Mr. Traylor wrote. "I respectfully submit that the fact that money is selling above par and that United States bonds, the best security in the world, are selling below par, is absolute evidence that we have too many bonds and not enough currency to meet the demands of the public."

Mr. Traylor wrote the secretary that he had not advocated the pumping of money into circulation, but simply suggested that the government give the public an opportunity to accept par value for their bonds in legal tender notes of the character described in his first letter.

In reference to the reduction of the public debt, Mr. Traylor concluded his second letter as follows:

"Of course all loyal citizens are pleased to learn that the government is reducing its bonded indebtedness, but I have a profound conviction that it would be far better to accomplish it in the way I suggested in my letter to the president than through the process of high taxes."

# AT KING'S HUNTER

Everything for the

Season Opens Nov. 20th

One day in the field or woods will add ten years to your life. Forget business cares and worries in a day of real sport.

There is plenty of game this year. Come here and get all "hooked" up, ready for a big hunting trip.

Prepare Now for This Season's Sport!

We have everything you need for a trip in the woods or fields, and you have only a few more days to equip yourself with the necessary things for the opening day hunt.

## SHOTGUNS AND RIFLES

If you have a good gun you will have good sport. We have them all good—some the BEST.

L. C. Smith's Double-barrel Shotguns... \$42.50 up

Remington Savage Repeating Shotguns... \$60.50

Remington Automatic Shotguns... \$75.50

Savage .22 Single Shot Rifle... \$9.75

Savage .22 Repeating Rifle... \$28.50

Savage .250, .3000 and .300 Cal. High-Powered Rifles—For lever action... \$60.00

For bolt action... \$65.00

Stevens Rifles... \$8.00 up

## HUNTING CLOTHES

Hunting Caps... \$1.50

Hunting Coats... \$4.00 up

Hunting Pants... \$2.50 up

Leggins... \$1.00 up

Shell Vests... \$3.50 up

Shell Bags... \$1.00 up

# ARE YOU A GOOD HUSBAND?

Every man who has a family must face the fact that provision should be made to save his wife and children from want, in case of accident, death or disablement.

Life is more uncertain than ever, in these days of traffic accidents. In 1920 \$4,500,000 was paid by life insurance companies for deaths from automobile accidents alone.

## Remember Your Tomorrow May Never Come!

Every man who takes life's obligations at all seriously should have accident insurance. Your wife and children will need ready cash in case of sudden death by accident

## That Is Provided By The Atlanta Constitution

Through the special "reader service" policy issued through The Constitution by the North American Accident Insurance Co.

If You Should Be Killed Your family will get \$1,000 cash upon proof of death from this Travel Accident Insurance Policy.

If You Should Lose Your Legs, Arms or Eyes

You still get \$1,000 from your policy upon proof of such disability.

If You Should Be Hurt You will get \$10.00 a week for the period of disability up to and including three months.

And if you should be injured or take sick away from home this policy provides up to \$100 to take care of you and put you in the care of relatives or friends.

AND \$250 is provided for DEATH IF KILLED BY A MOVING VEHICLE while riding or walking.

Your only obligation is to be a regular subscriber of The Atlanta Constitution and pay 75 cents, the policy and the newspaper service cost.

### **Travel and Pedestrian Accident Insurance.**

HAS BEEN SECURED BY THE ATLANTA CONSTITUTION FOR ITS READERS

Will pay the following amounts, subject to the terms of the policy, for death or injuries on a public carrier, due to its wrecking or disablement, while the assured is riding on it as a fare-paying passenger or due to the wrecking or disablement of any private horse-drawn or motor-driven vehicle on which assured may be riding or driving or being thrown therefrom, or for loss of life by being struck or knocked down or run over while walking or standing on a public highway.

The above indemnities will be paid, subject to the provisions and conditions of the policy. A complete numbered and registered Policy will be supplied each person. Be sure to read it before filing it away.

Any person who is a yearly subscriber and pays the regular subscription price, plus a delivery cost of 75c paid with this application. This 75c pays for all clerical charges in connection with the issuance of your policy. The premium on your policy is paid by THE ATLANTA CONSTITUTION.

91,000 killed in the United States by autos during the world war, while only 48,000 Americans were killed in the war. Over 1,500 auto, street car and steam car accidents in Atlanta during the last 18 months and new ones occurring nearly every day.

Many of The Atlanta Constitution readers have already protected themselves and families. Thousands of others are intending to do so, but they are doing just like you—you who are now reading this announcement, putting off until "tomorrow." Tomorrow the fatal accident may happen to you—then you and your family will be unprotected. The successful men of the day act today—the other kind wait till tomorrow.

### **Old As Well As New Subscribers May Secure This Policy**

By special arrangement with the North American Accident Insurance Company, we can now give this protection to the entire family on the following conditions:

Any and all members of a family from 16 to 70 years of age may secure this insurance, providing they all live at one address, and provided one member of this family signs for the daily and Sunday Constitution for one year. If two or more families live at one address in the same house or home, each family desiring the insurance protection must subscribe for The Atlanta Constitution. Each member of the family desiring a policy must sign "Order and Registration Form" and accompany it with 75c for registration fee for his or her policy.

Daily and Sunday Constitution by mail, payable in advance, or delivered by carrier, payable to carrier weekly or monthly:

|                 |        |

## The Constitution's Weekly Detective Story

### Delilah From Streatham

A PETER RUFF STORY  
BY E. PHILLIPS OPPENHEIM  
(Copyright, 1921, for The Constitution.)  
Next Week, "A Little Girl From Serbia."

(Continued From Yesterday.)

"The subject of Mr. Spencer Fitzgerald," he remarked, "seemed, somehow or other, to drop into the background during our luncheon. I propose, therefore, to continue to offer to Mrs. John Dory my most respectful admiration. If she accepts my friendship, and is satisfied with it, so much the better. I must admit that it would give me a great deal of pleasure to be her occasional companion—at such times when her husband happens to be in Glasgow."

"And supposing," Miss Brown asked, "that this is not all she wants—supposing, for instance, that she persists in her desire for information concerning Spencer Fitzgerald?"

"Then," Peter Ruff admitted, "I'm afraid that I must conclude that her uncharitable cloud of a husband has indeed stooped to make a tool of her."

"And in that case," Miss Brown demanded, "what shall you do?"

"I was just thinking that out," Peter Ruff said mildly, "when you spoke."

The friendship of Peter Ruff with the wife of his enemy certainly appeared to progress in most satisfactory fashion. The dinner and the portion of the way home in a taxicab, she made several half-hearted attempts to return to the subject of Spencer Fitzgerald, but her companion had been able on each occasion to avoid the subject. Whether or not she was the victim of her husband's guile, there was no question about the reality of her enjoyment during the evening. Ruff, when he remembered the flash of her eyes across the table, the touch of her fingers in the taxi, was almost content to believe her false to her truant lover. If only she had not been married to John Dory, he realized, with a little sigh, that he might have taught her to forget that such a person existed as Spencer Fitzgerald, might have induced her to become Mrs. Peter Ruff!

On their next meeting, however, Peter Ruff was forced to realize that his secretary's instinct had not misled her. It was, alas, no personal and sentimental regrets for her former lover which had brought her to his office. The pleasures of her evening's dining at Romano's and had a box at the Empire—were insufficient this time to the subject of her vanished lover. He tried stories—jealousy amongst other things.

"Supposing," he said, as they met close to one another in the box during the interval, "supposing I were to induce our friend to come to London—I imagine he would be fairly sure now if he kept out of your husband's way—that would happen to me?"

"You!" she murmured, glancing at him from behind her fan and then dropping her eyes.

"Don't you think that I should be doing myself a very ill turn if I brought you two together? I have very few friends, and I cannot afford to lose one. I am quite sure that you still care for him."

"Not a scrap," she declared. "Then why did you put that advertisement in the paper?" Ruff asked, with smooth but swift directness.

She was not quick enough to parry his question. He read the truth in her dimpled face. Knowing it now for a certainty, he hastened to her aid.

"Forgive me," he said, looking away. "I should not have asked that question—it is not by business. I will write to Fitzgerald. I will tell him you want to see him, and that I think it would be safe for him to come to London."

Maud recovered herself quickly. She thanked him with her eyes as well as her words.

"And you needn't be jealous, really," she whispered behind her fan. "I only want to see him once for a few minutes—to ask him a question. After that, I don't care what becomes of him."

A poor sort of Delilah, really, with her flushed face, her too elaborately coiffured hair with its ugly ornaments, her ready-made evening dress with its cheap attempts at smartness, her cleaned gloves, indifferent shoes. But Peter Ruff thought otherwise.

"You mean that, after I have found him for you, you will still come out with me again sometimes?" he asked wistfully.

"Of course," she answered. "Whenever I can without John knowing," she added, with an unpleasant little laugh. "If you only knew how I loved the music and the theaters, and this sort of life! What a good time you would have, Mr. Ruff!" she added archly.

It was no joking matter with him. He had to remember that he was, in effect, her tool, that she was making use of him, willing to betray her former lover at her husband's bidding. It was enough to make him, on his side, burn for revenge! Yet he put the thought away from him with a shiver. She was still the woman he had loved—she was still sacred to him! That night he pleaded an engagement, and sent her home in a taxicab alone.

(Continued Tomorrow.)

## 50 PEOPLE INJURED AS RESULT OF FOG

New York, October 30.—Weather forecasts tonight indicated no immediate lifting of the fog, said to be the heaviest in twenty years, which settled about New York harbor Saturday morning and has since been blamed for the injury of 50 persons in a collision of two elevated trains, the grounding of a ferry boat with 950 on board, and the tying up of all river and harbor traffic.

With untended conditions promised and a likelihood of rain, the city was basing its only hope of relief on fresh easterly winds said to be due and which might carry off the mist.

Several hundred persons were thrown into panic by the screeching of the injured following the crashing of "L" trains in Brooklyn.

The thick, opaque pall of fog was held responsible when the municipal ferryboat, Mayor Gaynor, carrying a heavy load of men, women and children, was forced to a mud-bank off Robbins' reef light. The passengers were marooned for more than six hours.

Only exhaustive playing by a band on board, heroically trying to keep up the spirits of the passengers, restrained some from jumping from the craft in an effort to swim to safety. The ferry was finally towed ashore by a tug.

Steamship offices reported few arrivals, most of the incoming ships being anchored outside the harbor.

Patent Is Granted

Atlanton Device

For Fastening Heels

Notification of the granting of a patent upon an appliance to hold wooden heels on women's shoes more securely than is now possible for them to be fastened has just been received by the inventors, M. D. Gleason, of Atlanta, and his brother, F. J. Gleason, of Rochester, N. Y.

Mr. Gleason states that the appliance consists of a bent device that is first securely fastened in the wooden part of the heel, and then inserted near the back of the shoe, and pushed forward between the outer and inner soles of the shoe. The heel is afterward cemented and nailed down.

It is then impossible for the heel to be wrenched off, as it may be by the present method. Mr. Gleason explains, under the new method, the heels may be put on at a cost to the manufacturer of 4 cents less a pair, Mr. Gleason says.

The patent probably will be sold to the United States Shoe Machinery company, outright, Mr. Gleason states, or handled by some large shoe store, as a royalty basis. Both brothers have brought out several patents, and are now working upon additional ones.

bidding. It was enough to make him, on his side, burn for revenge! Yet he put the thought away from him with a shiver. She was still the woman he had loved—she was still sacred to him! That night he pleaded an engagement, and sent her home in a taxicab alone.

(Continued Tomorrow.)

Read the stories of this gripping series by Mr. Oppenheim, the peer of all detective story writers. Each week in The Sunday Constitution Magazine one of these stories is started, and while each story ends by the Saturday following its start, the same character continues through the series.

## Amusement Directory

### THEATERS

Lyric Theater (Keith vaudeville)—See advertising for program.

Loew's Grand (vaudeville and pictures)—See advertising for program.

Howard Theater—All week, Delilah's "The Show," and other screen features.

"Nightie Night." (Coming to Atlanta Theater.) Seats for "Nightie Night" engagement at the Atlanta theater the last half of this week with a matinee on Saturday, begins at the box office at 10 a. m. today.

Built along the lines that lift it out of the conventional rut and contradicting the impression that farce cannot be farce unless it has one or more burlesque scenes and great gobs of lingerie, "Nightie Night" is play not conspicuous for its burlesque nor bathos, but because of the absence of adult sensuality. For a procurer of mirth, it is easily the best of the many farces presented here in recent years. From the moment the curtain rises on Trilby Lorraine seated in a billiard car, until the inevitable happy ending in the last scene, the auditors are in a constant uproar at the comical climaxes produced.

Harry Stubbs as Billy Moffat, the husband of a jealous wife, whose misgivings as to Billy's past causes him no end of trouble, is the featured member of the company.

Thelma White plays the part of Mollie, Billy's better half; Helen Namur appears as Trilby Lorraine, the Broadway dancer and former friend of Billy's; John Goodrich interprets the role of Nora, the movie-mad maid; and J. Warren Lyons portrays Philip Burton, the blundering brother.

Loew's Grand (vaudeville and pictures)—See advertising for program.

Howard Theater—All week, Delilah's "The Show," and other screen features.

"Nightie Night." (Coming to Atlanta Theater.) Seats for "Nightie Night" engagement at the Atlanta theater the last half of this week with a matinee on Saturday, begins at the box office at 10 a. m. today.

Built along the lines that lift it out of the conventional rut and contradicting the impression that farce cannot be farce unless it has one or more burlesque scenes and great gobs of lingerie, "Nightie Night" is play not conspicuous for its burlesque nor bathos, but because of the absence of adult sensuality. For a procurer of mirth, it is easily the best of the many farces presented here in recent years. From the moment the curtain rises on Trilby Lorraine seated in a billiard car, until the inevitable happy ending in the last scene, the auditors are in a constant uproar at the comical climaxes produced.

## Henry Ford Reveals Himself

A Character Sketch and Interview  
BY JUDSON C. WELLIVER

(Henry) Ford is a man of accomplishments. His position in the automobile manufacturing world, the systems and plans he has instituted and his methods of operating a railroad all have attracted worldwide attention. Following reports that a definite offer had been made to the government by Mr. Ford for the construction of a new highway, the American Review of Reviews secured an extensive interview with the manufacturer. This interview was prepared by Judson C. Welliver, and The Constitution believes presents some of its most interesting extracts. (The Editor.)

The other day I sat in a little, whitewashed office in a temporary factory structure at Dearborn, Mich., and heard Henry Ford talk about industry, economics, finance, war and peace, the future of agriculture, the Jews, and the certainty that here long things would be all made over.

From where I sat, I could see, a mile or two away, the roaring furnaces and belching chimneys, the huge derricks and traveling cranes, the mass of industrial structures that make up the Ford plant at River Rouge, where Mr. Ford said he would presently be turning out tractors at the rate of a million per annum. I had previously been to the Ford factory at Highland Park, turning out 4,000 motor cars a day. Mr. Ford had just told me how, a few months ago, when the financiers were trying to lend him \$75,000,000 and get a representation on his board, he had declined, raised \$39,000,000 from his own resources in 100 days, taken every dollar of war inflation out of his business, and kept it absolutely in his own hands. He had talked about the danger to business of banker domination; of the gold standard as a Jew invention to enslave the world; of the future of agriculture; of industrial structures, we wouldn't recognize it; that the millions of domestic animals that encumber the farms will disappear shortly from the earth; that water-powers would be harnessed to do the world's work; that war would be ended by the machine; that the world would make strides in wealth and intellectual gain, as never before.

"Fine Raw Material Shape." Almost nothing in the world satisfies Mr. Ford, yet he is the complete optimist. He is glad things are as "messed up" as they are because the mess has put the world in a position to make a new era. The "new era," as he calls it, is already here. For himself, he is just comfortably ready to begin on the truly big tasks he sees ahead. Day after day for a week he talked to me with amazing frankness, and with a confidence that he has done, and how; of what he hopes to do hereafter, and to help other men to do. A genius in mechanics, a revolutionist in industry, a Napoleon in business, he has visions of the future that are not distorted by any reflection of the past. He knows little and cares less. His eye and interest are all for the to-morrows.

His vision seems a strange composite of big ideas and fantastic notions. But one gets closer to his innermost thoughts, one has a glimpse of the man who is a daredevil to the fantasies. If one didn't know the man's record of making dreams come true, of turning fantasy to fact, he would sound like any other radical. His is the full of the "old populist stuff," with a tinge of the "holiest dope." It would be easy to dismiss it, if one could forget what he has done. But how about those belching chimneys and belching cupolas, over on the Rouge? How explain the record of his best, slender, gray-haired, gray-clad, modest, confident man, who has done in a few years? I thought: "He had visions thirty years ago; they have come true. He has visions of thirty years hence—why not they?"

Saving Money? It Doesn't Pay. I tried repeatedly to get him to tell me how he kept financial control of a business which started with nothing and grew beyond understanding. Finally he said: "That's a hard question; but maybe if I try seriously to answer, it will help some people." He wrote a few words on a piece of paper, "I can't give Monday and I'll see if I can't give you an answer."

"You certainly didn't get your belongings and keep your control of so big a business by saving," I ventured. "I never knew of anybody saving enough money to be of any real use. People who ultimately can use by real money never do it by saving."

I had no more than said it when he said I had made a mistake. I remembered Mr. Carnegie, who would have violently protested so untruthful a suggestion. I recollected Mr. Rockefeller's disquisitions on saving from which one might gather that, starting at a dollar a day, he had calmly saved up his

million or two. I remembered all the multimillionaires I had known, and their advice to save money, as they did, if you would become obsequiously solvent, as they are. So I feared I might have scared off Mr. Ford.

But I hadn't. I think that chance remark really set me a bit of his confidence. He smiled broadly, leaned back in his chair, stretched his long legs out over the top of a low radiator in front of the window, and said: "Do you know, I almost don't dare talk to young people, for fear I will be misunderstood. The other day I was asked to address a school, and was afraid I would horrify the elders if I did it. There is nothing in saving money. The thing to do with it is to put it back into the thing that you work into, into the thing that is important to what ever you are so much interested in that it is more important to you than money." That, of course, presupposes having something more interesting on hand than merely spending the money; and, with that corollary, is precisely the Ford way. "People get too greedy in a hurry for results," said Mr. Ford. Having probably accumulated more in a given time than any other man ever did, he regards his career as a lesson in not hurrying to succeed!

Getting Started. "It was twenty years," he said, "from the time I turned out my first motor car until I manufactured any for sale. In all that time I built only five. I was getting ready, preparing for the thing I had in mind. Or, take the tractor. We have spent \$10,000,000 getting ready to make and sell tractors; but we are ready now. We know what to make, how to sell it, and where the demand is."

"But," I interrupted, "have you not made and sold some 200,000 tractors already?" "I should say about fifty-three years ago," I am fifty-nine now, and I think I was six when I first began having trouble with my mother because of my habit of fussing with pots and kettles in her kitchen, trying to make an omelette the way, the first thing I set out to build was a tractor. I never could see any excuse for the way agriculture is carried on. Nothing else is so full of waste and drudgery. I was born on a farm, right over here; it's part of my home place now. I worked on it as a boy and began to realize it. Why, on my place now we farm 5,000 acres with about twenty days of real work a year. That's the way all farming will be done some day.

"Nothing could be more inequitable than the average farmer, his wife and their children, drudging from early morning until late at night. They have a few cows, and are slaves to them. Milk? One of the London papers came in the other day with a story of somebody who had produced a synthetic milk with the soy bean as its basis, as good as real milk, and healthier. All the domestic animals on farms will be swept out of existence before long. The horses at their heads off, the tractor sets only during the few days it works, and requires no attention the rest of the time. Meat? Go over to Battle Creek and they'll feed you a beefsteak that will satisfy you, but it never saw a cow. The proper elements, properly portioned, will make the same food, if produced scientifically, as if half the world had drugged to get them."

(Continued Tuesday.)

TEXTILE MEN  
MEET THIS WEEK  
IN HUB CITY

Boston, October 30.—Textile men from all parts of the United States and the world will gather in Boston this week for the convention of the National Association of Cotton Manufacturers and the International Textile exposition.

The largest exposition of textile machinery the world has ever seen will be displayed in the mechanics building this week, more than 125,000 square feet of floor space being occupied by exhibitors.

The exhibit will aggregate in value about \$2,000,000, including, as they do, practically every variety of cotton machinery, woolen and knitting machinery, power machinery and finished products.

The exposition will open Monday, and the cotton manufacturers will meet Wednesday and Thursday. In addition there will be meetings of the New England Commercial and Manufacturers' association and the Boston Wool association during the week.

## K. of C. To Honor Foch in Chicago In Big Parade

Governors of Eight States to Be Present—France Is Pleased Over Welcome.

Chicago, October 30.—One hundred thousand Knights of Columbus will parade in honor of Marshal Ferdinand Foch in Chicago next Sunday, Edward Houlihan, supreme director of the Knights of Columbus, announced today after a conference here of national executives and mid-west district deputies of the organization.

The war department, he said, has assigned a battalion of infantry and several batteries of artillery, and the navy department has assigned a battalion of Blue Jackets with bands for the celebration of Foch day under the auspices of the Knights of Columbus.

Marshal Foch telegraphed the Knights of Columbus through Supreme Knight James A. Flaherty, in Washington today:

"I am eager to visit Chicago, and look forward to spending Sunday with these Knights of Columbus whose pilgrimage to France last year will be an ever cherished memory."

Captain L'Hopital, Marshal Foch's aide, has advised the Knights that Marshal Foch will bring here with him the jeweled marshal's baton, said to be the costliest in the world, presented to him last year by the organization.

Eight Governors to Attend. The governors of eight states—Illinois, Michigan, Indiana, Ohio, Minnesota, Missouri, Wisconsin and Kansas—will attend or be represented.

The receiving party of the knights will include Supreme Knight Flaherty, Illinois, Michigan, Indiana, Ohio, Minnesota, Missouri, Wisconsin and Kansas—will attend or be represented.

John McCormack will sing for Marshal Foch at the banquet.

Veterans' organizations and Polish and Bohemian societies will cooperate with the Knights of Columbus, it was announced.

FRENCH REJOICING  
OVER FOCH WELCOME.

Paris, October 30.—The French newspapers except the radical publications are rejoicing over the welcome extended to Marshal Foch in New York and Washington, and it is pointed out in several editorials that the German propaganda which has for its purpose further amelio-

ration of the reparations terms will be set back as the United States learns the aims of France from Foch.

SAVANNAH BANK  
PLACED IN HANDS  
OF T. R. BENNETT

Savannah, Ga., October 30.—State Bank Examiner T. R. Bennett took over the affairs of the American Bank and Trust company of Savannah today. According to the examination statement a portion of the paper held by the institution was considered doubtful.

President J. H. H. Entelman, of the Commercial bank, today announced that a bank examiner had on Saturday discovered a shortage of \$1,000 in the accounts of W. A. Reiley, cashier. Reiley, Mr. Entelman said, appears to have absconded. He left the city on Friday with his family. The bank announced that Reiley's bond of \$25,000 protected the institution against any loss.

HEAD OF FLORIDA  
VETERANS IS DEAD

Tallahassee, Fla., October 30.—Newton A. Blitch, member of the Florida railroad commission and commander of the Florida division, United Confederate Veterans, died at his home here tonight. He had long taken a prominent part in the state's affairs and formerly was a member of the Florida senate.

Here is a high-grade Southern Investment

THESE BONDS are secured by a closed first mortgage on the Almadura Apartment Building, Memphis, Tenn., the land on which it is located and its equipment, the total being conservatively valued at \$320,000. The bonds are also secured by a first claim on annual net earnings of the structure, estimated at \$35,000.

The Almadura Apartments, located in a fine residential neighborhood, will be a six-story, reinforced concrete, fireproof structure containing 48 apartments. All modern improvements are provided, including electric elevators, in-door beds, steel kitchens and garbage incinerator.

BENEFIT THE SOUTH AND BENEFIT YOURSELF

By keeping your money invested in your own section you will increase the prosperity of that section, thereby increasing your own prosperity. "Southern Money for the South" should be the motto of every Southern investor. Interest rates are falling and an 8% rate will not be long obtainable.

The advertisements which we have been publishing in this paper in recent months have demonstrated that you can obtain right in the South a safe, high-grade, highly recommended investment in the shape of Miller Mortgage Bonds. The Almadura Apartment Bonds offer you such an opportunity.

You may obtain literature completely describing the Almadura Apartment Bonds without obligation to invest. Mail the accompanying coupon today and learn how to promote the South's prosperity and at the same time make a sound investment for yourself.

## Artificial Means Cannot Stabilize Exchanges

BY WALTER B. BROWN,  
Editor New York Commercial  
Westminster and the United Press.

New York, October 30.—One tremendous need for which the entire world is crying is a stabilization of the exchanges. It is useless to attempt to bring it about by artificial means. The proposition has been suggested in congress in connection with the tariff bill to refuse to recognize a reduction in the value of foreign currency of more than 62.5 per cent. This may be well enough for tariff purposes, but for all other purposes the actual value of foreign currency in relation to the American dollar will be taken into consideration. Readjustment can only come about by natural means, in which each country must do its part to return to normal conditions. This country's effort must lie in the direction of the expansion of our foreign business in both directions. It can be accomplished, as already indicated, by less hampering laws and by a more liberal extension of credits.

We are now in a position to do this, and it remains for us to perfect the machinery by which it may be carried through. This brings to the front for the moment the question of German reparations, and the consideration of whether or not the terms laid down by the allies are beyond their ability to carry out. This proposition has to be looked at only from its economic standpoint, for the allies would defeat their own ends if they placed a burden upon Germany greater than she can bear. The terms already proposed were, rightly enough, placed at the highest possible figure, and it will remain for Europe to demonstrate how much these they may be relaxed to come within the limit of her capacity. Neither Germany nor Russia can be ignored as factors in the world's economic fabric, and it is because of the plight in which these countries now find themselves that there is such serious disturbance in the entire foreign exchange situation.

Within our own borders, the time has come when our financial organizations can adopt a more liberal credit policy. Loans of the kind must come from the federal reserve, and conditions seem to be favorable for a further reduction in the rediscount rate. The federal reserve board is reluctant to recommend this step at this time, fearing it may lead to a period of re-inflation.

The writer holds no such fear at this time. Conditions which brought about a period of inflation, which forms the basis of our present trouble, are not present now. It will take a long time for the business of the country to recover to a point where there are enough surplus earnings to encourage extravagance, besides which there must be an equivalent recovery in other countries. The recent inflation was based upon artificial conditions, an aftermath of the war.

Business recovery, upon which we are now entering, is upon a stable basis, besides which the people are in a chastened mood, and the business houses have learned their lesson. A year or so ago, we had the mushroom export organization on every corner, but hereafter, export business will be in the hands of seasoned operators and under the control of more conservative methods. The country is in a position where legitimate business expansion needs all the encouragement possible. If there is a surplus of credit which seems likely to be within the next few months, the banking policy both of the party of individual bankers and of the federal reserve board, will be likely to shape itself accordingly.

Re-inflation, therefore, may be dismissed for the time being, to be taken up again only when the actual

## Atlanta Trade Is Slowly Showing Improvement

In a special letter to The Journal of Commerce, New York, the Atlanta writer, among other things, said, a few days ago:  
Many retail merchants visited Atlanta during the week, attracted doubly by the "Merchants' Week" of the wholesale fraternity and of the annual Southeastern fair. Practically all of them were optimistic over business conditions in their particular section, the consensus of opinion being that the tide had really turned and from now on conditions would continue to show a steady improvement.  
Wholesale shoe dealers are enjoying a rush business. They declare that the demand for shoes is so urgent that the merchants are not willing to wait for the tide to turn, but expect that the merchandise will be shipped by express.  
There was little change in the textile industry throughout the state during the week. P. E. Glenn, secretary of the Georgia Cotton Mills association, said that conditions were about the same as last week, with all of the mills running, some of them full time four days a week and others part time. He said that several mills booked large orders during the week, sufficient to keep them running at capacity until the end of the year.  
Estimates of the crop reporting bureau show that Georgia growers received something over \$12,000,000 for the peach, watermelon, cantaloupe and other crops this year. There were 35,791 cars of melons shipped; 16,472 cars of

## What Lumber Market in the South Is Doing

The American Lumberman says: "The market retains its strength and the better grades of softwoods, particularly, are scarce. Industrial buying has increased somewhat and the railroads take considerable quantities of some grades. Card siding is particularly active in the south, and the supply seems insufficient. Hardwoods move better and prices are firm, more and more lumbermen are inclined to the opinion that next spring the hardwood market will be very active and prices will rise rapidly because of the low and badly broken stocks at the mills."

## Big Record for Cotton Loans By Atlanta Bank

The Citizens and Southern bank, of this city, announces it loaned recently to cotton merchants, in twelve days, a total of \$14,262,323.77, an average of more than \$1,000,000 a day, believed to be a record in this section for cotton loans.

## Canned Sweet Potatoes "Taking Hold" in N. Y.

Southern packed sweet potatoes are "taking hold" in the New York market, and better more and more. They were introduced in a small way several years ago, but did not meet with the favor of the public. This was largely due to the lack of uniformity in packing, canners slamming the yams into the can any way. Although the taste and quality was there, the appearance was not, and the New York market is largely sold on "looks."

Now, however, the canners are taking more pains with the appearance, and the consumer in the north has learned to appreciate the quality of the choice southern yams. Increased business is the logical outcome.

## Cotton Ginnings Indicate Very Light Yield

Ginnings of 5,447,397 bales for the period up to October 18 were reported, a 4.3 per cent. increase over 5,254,382 bales during the same period a year ago. Accompanying the ginning report was statement to the effect that a large portion of the crop had already been ginned.  
The report by states shows Texas ginned 1,740,766 bales, against 2,596,800 bales last year. Tennessee ginned 158,660, against 53,619 bales. Oklahoma has ginned 347,146 bales, against 377,312 bales. Alabama 426,132 bales, against 281,957 bales. Arkansas 449,484 bales against 351,373 bales. Georgia, 637,129 bales, against 726,050 bales. Louisiana 195,115 bales, against 294,109 bales. Mississippi 512,007 bales, against 349,777 bales. Missouri, 40,333 bales, against 13,593 bales. South Carolina 494,261 bales, against 562,097 bales, and North Carolina 444,964 bales, against 190,812 bales. In some cases, as for instance Texas, the total ginned during the same period in 1920 is more than the entire expected crop for this year.

## Capital Hide and Junk Co. Fast-Growing Firm

It may be of interest to many Atlantans to know that among the fast-growing firms of this section is the Capital Hide and Junk company, office and warehouse No. 331-333 Peters street. Also with a yard and warehouse on a railroad siding, fully equipped to take care of the hides they are specializing in handling. The company is always in the market for products such as hides, furs, wool, iron and all kinds of metals. At the present time it is also handling government war surplus property on large scales.  
Capital Hide and Junk company has been established since 1913, by J. H. Rodbell, head of the firm. Mr. Rodbell is very optimistic about the future growth of their firm and also future conditions, which he believes are fast improving. Although the prices for their products are not very high, however, there is a great demand.

## Ruralist Press Trade Extends Throughout South

Atlanta is the center of the printing industry in the south, just as it is headquarters for practically every other class of business in the section. Great progress has been made in recent years in printing and Atlanta has kept pace with this development.  
The Ruralist Press, Inc., of 116-118 East Hunter street, is one of the leading printing establishments in this section. It has facilities for handling practically every class of work, ranging from the small commercial job to large catalogues, produced in a variety of colors. The Ruralist Press specializes in catalogues and sales literature. It serves a clientele extending throughout the south and to several more distant states, in the preparation and production of direct mail advertising campaigns.  
In addition to batteries of job and cylinder presses, the Ruralist Press is equipped with two large rotary presses capable of turning out "runs" of hundreds of thousands of books and magazines at a minimum cost. The equipment in every other department is as modern and complete as its pressroom facilities.  
The officers of the company are: President, F. J. Merriam; vice president, H. G. Hastings; second vice president, L. D. Hicks; secretary-treasurer, W. J. Mills; manager, Lee Lindsay.

## Wholesale Confection House Enjoying Fine Trade

One of Atlanta's staunch business concerns is the Griffith Sales Corporation, wholesale confectioners, which was organized in Atlanta in 1918, but up to April of this year handled only fancy package lines. The company is now traveling five men and is enjoying a good patronage in Atlanta and surrounding territory in penny, nickel and fancy package goods.  
The company has the exclusive distribution of the Stephen F. Whitman small package line. Whitman's more marshmallows in tubs is a very popular seller, and is being handled by most of the leading drug stores in Atlanta.  
The Griffith Sales Corporation is carrying a very large and complete stock of confections which assures the trade their orders can be filled without substitution.  
The president of the concern is C. P. Griffith; vice president, Louis H. Morris; secretary-treasurer, E. J. Frick. Thomas S. May and C. P. Griffith call on the city trade and buy goods of good volume of business, reporting sales increasing. Cornelius Riddle, M. Carson, Jr. and F. Yancey are calling on the country trade. New customers are being added to their books daily and the outlook for a big fall business is promising.

## GAS RATE REVISION HEARING OPENS TODAY

Hearing of the Atlanta gas rate revision case will begin at 10 o'clock Monday morning, in the courtroom of the state railroad commission at the capitol. Representatives of the Georgia Railway and Power company, lessee of the Atlanta Gas Light company, will present the case of the company, which opposes any further reduction in rates at this time. The company representatives will be headed by H. M. Atkinson, chairman of the board of directors; President Preston S. Arkwright and Attorney Luther Z. Rosser.

## THIS YOUNG MOTHER

Tells Childless Women what Lydia E. Pinkham's Vegetable Compound Did for Her

Millston, Wis.—"I want to give you a word of praise for your wonderful medicine. We are very fond of children and for a considerable time after we married I feared I would not have any owing to my weak condition. I began taking Lydia E. Pinkham's Vegetable Compound and now I have a nice strong, healthy baby girl. I can honestly say that I did not suffer much more when my baby was born than I used to suffer with my periods before I took Lydia E. Pinkham's Vegetable Compound years ago. I give all the credit to your medicine and shall always recommend it very highly."—Mrs. H. H. JANSSEN, Millston, Wisconsin.

How can women who are weak and sickly expect or hope to become mothers of healthy children? Their duty is to themselves. They build over the development of ability that is dragging them down, strengthen the entire system, as Mrs. Janssen, by taking Lydia E. Pinkham's Vegetable Compound and give their children the blessing of a good constitution.

from the boyhood of the apostle, and applied them to the lives of the boys of today. The fair and concert that was given by the young women's "gym" class on Friday night was well attended. On account of the rain on Saturday evening the Saturday night program will be repeated this Tuesday night at 8 o'clock. The total attendance in the physical department for the past week was \$35. Total number of boys using the boys' social room for the week was \$35. The boys' department is already too small for the work in the evenings. They have to be taken in groups so as to accommodate all of them.

## W. A. SIMS MAY OPPOSE CONGRESSMAN UPSHAW

In addition to a race for mayor and a state election, Atlanta may become the storm center of an interesting free-for-all contest for congress next summer, according to reports circulating in political circles, the general opinion being that Congressman W. D. Upshaw, who represents the fifth district, will have opposition.

The latest name mentioned in connection with the congressional race is that of Walter A. Sims, prominent Atlanta lawyer and a member of city council. It was learned Sunday that Mr. Sims is giving serious consideration to suggestions made by his friends that he cast his hat in the ring in the congressional race.

Several others have been mentioned as candidates, among them being Ben M. Blackburn, who made the race last year, and also Hooper Alexander, former United States district attorney, who also was in the race against Congressman Upshaw last year.

Mr. Sims would neither deny nor confirm the rumor Sunday that he will enter the race for congress. It is known, however, that he has been approached by several political leaders who asked him to make the race next summer.

Congressman Upshaw is now serving his second term in congress. He made his race last year asking that he be given an endorsement by election to a second term. He was elected over two opponents. It was learned that he will certainly offer for re-election in the next primary.

## WOUNDS NEGRESS AND IS SHOT DOWN BY PURSUING MOB

Hattie Sannin, negro woman of 67 Gray street, is at Grady hospital dangerously wounded in the head by a stone, said to have been hurled by Claude Johnson, negro, of 69 Emmet street, and her assailant is in another ward at the hospital with a bullet through his abdomen fired from a pistol in the hands of a pursuing member of a posse of 25 or 30 negroes. Johnson and the Sannin woman got into an argument Sunday afternoon and Johnson, it is said, concluded by reaching for a jagged stone and tossed with unerring aim at Hattie's head. Her colored neighbors, growing incensed at the attack, quickly organized an impromptu posse and went after Johnson, who sought safety in flight. He was winding his pursuers when a well directed shot struck him. Police arrested Jim Walton, of 64 Victoria street, and are holding him on the charge of suspicion in connection with the shooting.

## MRS. W. A. WAGGONER DIES IN NEW PARIS

News was received in Atlanta Sunday night of the death earlier in the day at her home in New Paris, Ohio, of Mrs. W. A. Waggoner, wife of W. A. Waggoner, former secretary of the Railroad Y. M. C. A. in Atlanta, for twenty-eight years. Mrs. Waggoner was known to hundreds of railroad men in Atlanta and the southeast. The funeral and interment will take place in New Paris.

## HEAD OF PORTUGAL TO RETAIN POST

Lisbon, October 30.—President Almeida, speaking from a window in the palace today to a great throng which had congregated for the purpose of urging him not to resign his office, declared that he would retain his post. He exhorted everybody to stand by him and aid in upholding Portugal. His speech was hailed with great enthusiasm. The procession which traversed the streets of the city on the way to the palace included naval and military bands, and representatives and persons from all the municipal councils and parishes of the country.

## Deferred Payments on Diamonds

You can buy a diamond here by making a cash payment of one-fifth the price. After deducting this, we charge only six per cent simple interest on the balance, which may be paid in ten equal monthly payments.

All of our diamonds are marked in plain figures, showing the net cash price, so you can take your choice of buying for cash or taking advantage of our attractive deferred payment plan.

Write for booklet, "Facts About Diamonds," and twenty-sixth annual catalogue.

Selections shipped prepaid for inspection.

## Corn and Cowpea Weevil Very Destructive

BY MARTIN V. CALVIN

Statistician Georgia Department of Agriculture.

Farmers and merchants throughout Georgia are very much and very properly, exercised over the confrontation which threatens them in the matter of the corn and the pea weevil. Indications point to an extraordinary visitation of these destructive pests. Merchants and farmers are putting themselves in battle array—preparing to protect themselves against the weevil. Every day letters come to my desk seeking information as to the means by which, and in what way, the pest may be controlled; that is, killed.

For years these destructive insects were regarded as "a matter of course"—there being no known means of control. I recall that in passing the storeroom of Messrs. P. G. Burum & Co., in Augusta, several years ago, my attention was attracted by a great number of sacks, full of cow peas, stacked on one side of the pavement. I noticed that there was a multitude of pea weevils on the outside of each sack. There were many more weevils on the inside of each sack. A sign quoted the peas at a reduced price per bushel, stating that while the peas were deeply burrowed, the germ had not been affected, so they were good for planting in July for hay, etc. That was a bright June day—a day delightful to the weevils; they confirmed the statement as to their active presence by showing themselves.

It is well known that, if left in charge of a lot of corn or peas, weevils will reduce the mass to dust. What is needed is to combat them vigorously in the beginning. The true policy is to take time by the forelock.

It is not generally known that infestation begins in the fields. It would be wiser to de-shuck corn before storing in crib; wiser to thresh peas before storing them. Machine threshed peas bring good prices.

The Remedy. It is not the purpose of this letter to place before you the losses visited upon farmers and merchants by the corn and the pea weevil. The supreme question is, what is the remedy in the premises?

There is only one remedy now available, that is, a judicious use of carbon bisulphide, sometimes called carbon di-sulphide. We will not split hairs on that branch of the subject; let's call it "sulphid" for short. This is a liquid that is highly inflammable. You know that you must be exceedingly careful in handling gasoline; you need to be very much more careful in handling for use the "sulphid" mentioned.

You have a lot of shelled corn which you wish to treat. Put it in an air-tight barrel—usually a sugar barrel will answer. Or you can construct a number of air-tight bins. Fill barrel or bin with corn to a point within 12 inches of top of barrel or bin. Have the liquid in a shallow pan of suitable size; fill pan with quarters full of the liquid. Have ready either a blanket or closely woven sack to spread over top of barrel or bin as soon as the pan has been set on top of corn about the center of barrel.

Let your man leave the house at

## MILLIONS WILL NEVER DIE, CLAIMS POWELL

An eloquent address was delivered Sunday afternoon in Cable hall on why "Millions Now Living Will Never Die," by Grover C. Powell, of Nashville, Tenn., before a large audience.

Mr. Powell stated that the second coming of Christ is at hand and that those who will live godly lives when He sets up his "New Jerusalem" will live forever. He predicted that 1925 is the time of that coming. "When the earth's troubles shall cease and the blessings of life shall begin to be offered to the human race."

Mr. Powell's speech follows: "All Christians believe that the Bible is God's Word of truth. All Christians, Catholic and Protestant, agree that the Bible teaches that God created the first man perfect; that this man sinned and was sentenced to death before he begat any children."

Mr. Powell's speech follows: "All Christians believe that the Bible is God's Word of truth. All Christians, Catholic and Protestant, agree that the Bible teaches that God created the first man perfect; that this man sinned and was sentenced to death before he begat any children."

## BANK OFFICIAL HELD ON CHARGE OF EMBEZZLEMENT

Cleveland, Ohio, October 30.—Joseph F. Montie, 29, treasurer of the

Cleveland Italian Savings Bank company, was arrested tonight on a warrant based on affidavits sworn to by State Bank Examiner Frank A. Hunter, charging embezzlement of \$25,000 of the bank's funds. The bank closed its doors Septem-

ber 1, had a surplus of \$100,000, of \$150,000, and was custodian for an additional \$50,000 in money orders in transit. A former official of the institution declared tonight the bank would pay its depositors dollar for dollar.

## Golden Key Gives Coffee a Better Flavor

Many people prefer Golden Key Milk to fresh cream for coffee. There's a rich, smooth taste about Golden Key which seems to blend delightfully with the flavor of good coffee.

In a test recently conducted, 24 families were given numbered cans of Golden Key and four other leading brands of evaporated milk, with the labels removed. Eighteen out of the 24 chose Golden Key for first place on taste, color and appearance.

You will probably like Golden Key better than any milk you have ever used. Use it in coffee, in cooking, over cereals—in fact, wherever you would use fresh, whole milk. Look for the key on the can.

# GOLDEN KEY MILK

Pure, Rich Milk—Concentrated!

**\$1,000**  
To Every Registered Subscriber  
—OF—  
**THE ATLANTA CONSTITUTION**  
Old As Well As New Subscribers May Secure This Policy

By special arrangement with the North American Accident Insurance Company, we can now give this protection to the entire family on the following conditions:

Any and all members of a family from 16 to 70 years of age may secure this insurance providing they all live at one address, and provided one member of this family signs for the daily and Sunday Constitution for one year. If two or more families live at one address in the same house or home, each family desiring the insurance protection must subscribe for The Atlanta Constitution. Each member of the family desiring a policy must sign "Order and Registration Form" and accompany it with 75c for registration fee for his or her policy.

More than 1,529 accidents in Atlanta during the last 18 months caused by autos, steam cars and street cars. The Accident and Pedestrian Insurance offered by The Constitution would have covered almost all those accidents.

You may be next. Why not protect yourself and family today?

No red tape—no medical examination—every man or woman from 16 to 70 eligible. All you have to do to get this insurance is to be a subscriber to The Atlanta Constitution.

The only charges for this policy is seventy-five cents (75c) for covering the cost of securing and handling. Pay for The Daily and Sunday Constitution at the regular price.

## HERE ARE THE PAYMENTS MADE UNDER THE CONDITIONS OUTLINED In The Atlanta Constitution Policy

|  |            |  |            |
|--|------------|--|------------|

## The Constitution's Weekly Novel The Heritage of Cain

BY ISOBEL OSTRANDER

(Copyright, 1921, for The Constitution.)

Next Week  
"The Spoils of the Strong," by Eleanor Talbot Kinkadee, Starting Sunday.

(Continued From Yesterday.)  
"Quite right, Mrs. Brownell. I only wish you could remember the name of that little station in New Hampshire you went to."

"Yes, sir, I wish I could! It was the name of a mountain, as I told you—something 'Mountain' was the name. 'Look'—there, it's coming back to me! I was sure it would! 'Look'—something—'Mountain, Look'—'Look'—'Lookoff!' That's it, sir!" she cried excitedly. Lookoff Mountain! I'm sure of it as that I'm sitting here!"

York had a long and tedious journey to the obscure station by Lookoff Mountain. He found nearly all the dwellers there newcomers, and was referred to old Jabez Tuttle in the neighboring village of anything dating back more than five years. He found the aged Jabez only too glad to talk, and when York asked him if he remembered of any child being adopted by strangers twenty-nine years before, Jabez exclaimed:

"Twenty-nine years ago! I was just twenty-nine years ago my three was adopted!"  
"Your three?"  
"The three orphans I had charge of, up to the poor farm! I was over-see them for more than forty years!" at the time I'm tellin' you of I had three orphans on my hands—two sisters and a brother. The boy was the oldest—he was about six or seven, an' ex orsary a little cuss as I ever see. A family named Holcomb or Hallam, or some such name, 'dopted him—folks that lived in th' state of New Jersey, an' had read 'bout 'em all in th' papers. Then, Sarah, she was about three or four. Miss Jervis, over to Lookoff, took her, but she died of pneumonia in a year or two. Th' baby—an' a bright little critter she was too, 'bout three months old, or maybe a little more—a lady from New York took her."

"What was her name?"  
"Th' lady? Wal, now, I just can't recall it, but it's all in th' records in th' office up in th' poor farm yonder, and a copy in the county clerk's office. Th' baby's name was 'Vivry—Elviry, for her poor ma."

"Was the lady's name, by any chance—Bigelow?" York asked hesitatingly.  
"No, but seems ter me 'twas somethin' like that."

"Why, who were the children—what was there in the papers for people in other states to read about them? Whose children were they?" The old man chuckled gleefully.  
"Ye'll be sprised when I tell ye, I'll lay!" he cried, rubbing his hands.

Each week The Constitution gives its readers a \$1.50-\$1.90 novel free. Starting in Next Sunday's Constitution Magazine, read "The Spoils of the Strong," by Eleanor Talbot Kinkadee. The novel will be completed by the following Saturday.

## Atlanta Prep Schools Start Intercollegiate Strife This Week

### Boys' High Vs. G. M. A. and University School Vs. Tech High in the Schedule.

By Roy E. White.

Boys' High school against G. M. A. Friday afternoon, University School for Boys and Tech High Saturday morning, and Marist against Georgia Tech High on Saturday is the main event of prep football for the week-end.

In glancing over the games it looks like the city prep football title will be settled between Boys' High and G. M. A. and University and Tech High. It is a certainty that two of the four will be eliminated from all claims and the other battle will take place on the 25th of November.

This is the best week-end schedule that the preps of Atlanta have had in many a day, for there is certain to be a battle to the finish between Tech High and University, for Coach Hager's Bluebirds eleven is making quite a bit of noise in the prep circle on its second attempt at prep football.

The Tech High team is still recuperating from an attack at the hands of the Monroe and Gordon teams, but they are making every effort to have every man in the line-up for Saturday. This will be the first time that Tech High will meet the University eleven on the gridiron, and it will be a game worth several times the other prep games.

**Bluebirds' Fine Record.**  
The University eleven has lost but one game this year and that came at the hands of the Georgia Freshmen by a close score of one touchdown.

Coach Hager's men were not looking for anything else, since the Georgia men are trying for varsity Bulldog berths. It was a credit to the Bluebirds that they were able to hold the Freshmen team and the University eleven is proud of its record. They have beaten Boys' High, Athens High, Locust Grove and Darlington. Their victories have been clean and on straight football.

The game Saturday will be a game of forward passing against forward passing and punting against punting. Both Tech High and University have excellent punters and receivers. Laird does the punting for University, while Captain Richardson does the kicking for the Junior Smithies. From observation, the writer would give the edge to Captain Laird, of University. His kicks are long and are placed so as to make the most out of the play.

Not only is Laird a great punter, but he is one of the best passers that has ever been on a local gridiron. His passes are long and very accurate. Several times he dropped back to punt and received a bad pass from the center, and by some quick headwork he threw a long pass to one of the ends for long gains.

**Richardson, Good Punter.**  
Captain Richardson is also a good punter and an excellent forward pass receiver. Richardson has scored several touchdowns by the pass route. Saturday both teams will present their strongest line-up and the team that can outlast the most tiring and long punts will be returned victor. Both lines are able to hold the other, and the game will result to a punting or passing affair.

The Boys' High-G. M. A. game should be no more than a hard game of the year.

Coach Pool's Boys' High eleven is badly crippled, but the majority of the crimples are expected to be in shape for Friday afternoon. Pat Stephens, end, and Coach Pool's eleven, will be missing for the remainder of the season, due to an injury to his knee several weeks ago. Clyde Wallace, quarterback for Boys' High, is not expected to play any more football this season. He also has a fracture of the knee, and is still unable to move around with any degree of ease.

Let's not forget the Marist-Gainesville High game Saturday, for this game will be very interesting. In that both teams will be very much higher than usual prep teams, but both possess very fast backfield.

Coach Dean's Marist eleven have been going like a house afire for the past several weeks, and are hoping to give the Gainesville Indians some more of its pep and fight. They are a fast, tough, prep football eleven, and Coach Dean's team would be a mighty good prep eleven together.

### FUNERAL SERVICES FOR GEORGE WADE TAKE PLACE TODAY

The funeral of George H. Wade, well-known Atlanta, who died suddenly Saturday morning, at his home, 410 Oakwood street, West End, will be held from the residence this morning at 10 o'clock with Bishop H. J. McKel, of the Episcopal church, officiating. Interment will be at West View cemetery.

Mr. Wade, who was 56 years old, was one of the pioneers in the electrical business here and was one of the best known men in this line in the city. Mr. Wade installed the first electric light in Atlanta. Later, as superintendent of the Georgia Electric Light company, he pulled the controller that set the first electric trolley in motion.

Some years afterward Mr. Wade became connected with a stock company that built the Washington and a Mason and a mill at Marietta, Ga. He was secretary-treasurer of the Washington and vice president of the Georgia Electric Light company.

Returning to Atlanta he re-entered the electrical business, and was in charge of the electrical work at Camp McCall and in the city of the arrival of troops. He was a member of the Episcopal church.

Surviving Mr. Wade are his wife, Mrs. George C. Wade, one daughter, Mrs. C. C. Scroggs, and one son, L. D. Wade.

## FOUR TIED IN CONFERENCE

Chicago, October 30.—Half way point in the western conference football season finds four eleven's swinging into the championship deciding struggle with even chances of gaining first place. Wisconsin, Ohio State, Chicago and Iowa are undefeated and picking probable survivors in a very extremely difficult.

The standing tonight, including only conference games, follows:  
TEAM W. L. T. Win. Loss  
Wisconsin..... 2 0 0  
Ohio State..... 2 0 0  
Chicago..... 2 0 0  
Michigan..... 2 0 0  
Minnesota..... 1 1 0  
Indiana..... 1 1 0  
Purdue..... 1 1 0  
Illinois..... 0 2 0  
Nebraska..... 0 2 0

Saturday's games were rather colorless. Wisconsin's 25-0 victory over Minnesota being perhaps a little more one-sided than predicted and Michigan's 3 to 0 margin over Illinois closer than some had expected.

One of the most important games of the week will be played Saturday here at State field when Ohio State and Chicago will meet in a contest likely to eliminate one from the race.

Ohio rested Saturday in preparation for this battle.

Jowa maintained its tie for first place in a rather disappointing 13 to 6 victory over Purdue. The Hawkeyes face Minnesota next Saturday at Minneapolis and then Indiana and Northwestern, this schedule being almost certain to take them through the season undefeated.

Michigan, through the 3-0 victory over Illinois, still is a mathematical championship possibility, but few believe the Wolverines much chance. Illinois, generally a little contender, is fighting only to get out of last place, while Purdue, Indiana and Northwestern and Minnesota have no show.

Northeastern will try Purdue Saturday in a game affecting only the dispute over last place, while Illinois expects to take it easy with DePauw.

### CAPACITY CROWDS HEAR EVANGELIST CLOSE CAMPAIGN

Before a crowd that filled the big Baptist Tabernacle to its utmost capacity and overflowed into the foyer and anterooms, "Cyclone Mack" McQuade, closed his evangelistic campaign in Atlanta Sunday night with the most dramatic and most spectacular sermon of his ministry on the subject, "No Backsliding."

The sermon was the fourth delivered during the day by the evangelist and the attendance for the four sermons was over 10,000 people, according to estimates made by church officials. Sunday morning "Cyclone Mack" preached to a huge congregation on the subject, "Let Us Run the Race." In the afternoon he preached to a capacity congregation on the subject of "Heaven."

In his sermon Sunday night Mack painted a vivid word picture of the life of the man who is not saved. He told of the ever-present danger surrounding such people and contrasted their position with the condition of the men and women who have given their lives to God and are happy and cheerful in their belief that they will be ready to die at any time confident that they are saved.

After the services Sunday "Cyclone Mack" made dramatic appeals to those in the congregation to come forward and give themselves to God. During the day it was estimated that about 200 conversions were made.

No figures have been compiled on the total number of conversions, but it is believed that more people have entered the church than in any revival held at the Tabernacle in years.

### AMPICO CONCERTS HERE THIS WEEK; PLANS ANNOUNCED

Mr. Linz Seller, the distinguished music critic and literary editor, has been selected to direct the educational department of the Ampico with special reference to its use in schools, colleges and musical institutions where the value of study of the great pianists through the Ampico records is now being thoroughly recognized and appreciated.

Ludwig & Bates Co. of this city have made arrangements for a series of Ampico concerts to be given throughout the city. Charles Cooper, the well-known pianist of New York, and Miss Ethel Rust Moller, soprano, will appear at all the concerts. They will play at the Washington seminary, Lions club, Music Study club, Norris Candy company, Girls' High school, Atlanta Woman's club, Commercial High school, City Club, the big music memory contest for children Saturday, November 4, at 10 o'clock, and an invitation feature recital at the Auditorium on Friday evening, November 4.

### POOL NOT TO RUN Americus to Select Three Aldermen Next Month.

Americus, Ga., October 30.—(Special.)—J. E. Moore, pool, who has been a member of the Americus city council during the past 20 years, today announced he would not again be a candidate. His term will expire January 1, and a primary to nominate his successor will be held early next month.

W. E. Taylor and Richard E. Allen, the other members of council whose terms will expire with Moore's, are both candidates for re-election. J. Rawlston Carrell has been mentioned as a candidate to succeed Moore, but he has made no statement of his intentions.

## BIG 3 BUSY THIS WEEK

New York, October 30.—Under the signs of defeat for the first time since 1914, Harvard's gridiron clan today was looking with anxiety toward its game with Princeton next Saturday—the first of the season's three big clashes.

Before the Centre college eleven, of Danville, Ky., one of the finest colleges in the south, Harvard went down to a 6-0 defeat on Saturday.

Only the week before, Harvard had barely managed to tie the battering Besek eleven from Penn State and in the game of the week before that it had a hard tussle with Georgia university, winning by a field goal. Princeton also has had a disastrous season. The Tigers lost to the Naval academy, 13 to 0, and went down in defeat again before Stagg's Cherokees, 9 to 0.

They crawled out of the depths on Saturday, however, and defeated Virginia, 34 to 0.

**McMillin Makes History.**  
"Bo" McMillin, a Texas selected as all-American quarterback in 1919, scaled great heights in the game against the Crimson. It was McMillin who made the lone touchdown of the game on a great run of more than thirty yards through Harvard's first and second defensive lines and it was the same "Bo" who directed his men in a series of plays that completely baffled the Crimson. Red Roberts and Snoddy also starred for the Blue Grass boys.

Centre was making a comeback in the game against Harvard, the "Golden Tornado" from Atlanta, which were reduced to a mere dust cloud by Hugo Besek's Penn State crew. Fully rested after its splendid game against Harvard of the week before, Penn State displayed great strength in both attack and defense which tells the 28-7 story of victory.

Yale, with Maryland university on its schedule for next Saturday, came through the season without defeat. Brown was the victim of the Eli eleven Saturday, furnishing little opposition for the Bulldogs, which won, 45 to 7.

**Pittsburgh Goes Strong.**  
Glen Warner's highly efficient Pittsburgh eleven threw a dashing offensive against Penn's line and scored four touchdowns in the first half. Penn shook itself together in the last quarter and launched an counter attack which fell away before the Pittsburgh line. Pittsburgh won, 28 to 0.

Cornell crushed Dartmouth, 59 to 0. Nervous at first, Doble's backs fumbled many times, but soon settled down and, with the exception of the second period, were masters of the situation. Dartmouth's lone touchdown came on a series of rushes after a Cornell fumble.

The Navy added Bethany to its victims, 21 to 0, while the Military academy reserves toyed with Susquehanna to win, 53 to 0.

Syracuse, though battling hard, lost to Washington and Jefferson, 17 to 10, and Lehigh took West Virginia, 21 to 14, displaying a more versatile attack.

Fordham and Boston college battled to a scoreless tie, while Columbia was humbled by Williams, 20 to 0. The New Yorkers outwrestled their adversaries from Williams town, but the latter had better luck in a ragged game.

Colgate and New York university each scored a touchdown in a thrilling struggle.

**NON-PARTISAN LEAGUE  
TO TRY COMEBACK**

Fargo, N. D., October 30.—The non-partisan league, swept from control of this state by a recall election which retired Governor Lynn Frazier, three times chief executive, will attempt a comeback through an organization soon to be launched, according to its leaders.

In the meantime, the league leaders will seek to invalidate the recall election, because of alleged illegal signatures on the petitions which caused the election. There were 80,000 signatures on the petitions.

The league's program as set by R. M. McClintock, league official, said, "They constitute a majority in the state. The condition of our farms, due to deflation, low crop prices and high freight rates cry aloud for reform and we will have a new organization to restore the league to power in its fight for the farmers."

The election made by A. N. Vestes, candidate of the independent Voters' association, governor, and also posed William Lemke, attorney-general, and William Hagen, labor commissioner. Sveinbjorn Johnson is elected attorney-general and William Kitchin, labor commissioner.

Besides the radical recall officials, the election, according to incomplete returns, orders a revision of state banking laws and the control of state-owned industries.

It also breaks the control of the Non-Partisan league in its home state.

The Independent Voters' association is a fusion organization.

## Will Consider Offer by Macon For Next Georgia-Auburn Contest

Announcement was made last night that Professor S. B. Sanford, of the University of Georgia, and Professor C. L. Hare, of Auburn, will meet in Macon ten days from now to hold a conference there with citizens who are interested in an effort to stage the Georgia-Auburn battle next season in that city, instead of in Columbus where it has been played for several years.

Columbus is very anxious to keep the game, however, and it is the opinion of many Georgia and Auburn men that no change will be made in view of the fact that 13,000 were present at the game Saturday, an increase of more than five thousand over last year. Then, too, the alumni of both institutions have been impressed with the fine reception their teams and all visitors have received in the river city; the hospitality shown by everyone; the impartiality of the stores in decorating for the game; and the fact that a fine stadium has been erected by the city council and the Muscogee county commissioners.

It is also announced that as a result of the game, each team will receive \$5,000 net, no charge being made by Columbus for the rent of the field.

## More Southern Games For Tornado Dixie Title To Be Empty This Year

There is talk going the rounds that the Golden Tornado is to have its southern schedule next year. In this connection it is devoutly to be hoped that some action will follow the talk.

And by the same token there is a movement afoot in all the colleges to pay more attention to providing an attractive sectional schedule rather than center football activities for a year on some intersectional game.

In justice to Georgia Tech, let it be hereby stated that this talk was going the rounds long before Tech's defeat at the hands of Penn State. The talk was rampant while Tech supporters were confident that the Tornado would take the measure of the Nittany Lions.

And right now Tech is figuring on one big intersectional game. It hasn't heard whether or not there will be a renewal of the Tornado game in New York next year or not. The first game seems to have been attended by a splendid crowd and a splendid spirit. However, next year, the game will have lost something of its flavor of novelty and Broadway insists on its novelty—oh my yes.

These intersectional games are plentiful and stirring all right but here is their drawback, the team begins polishing for this big game, which is played in midseason. Accordingly it takes on no really serious opposition until this big game is played. It wouldn't do at all to take a team all the way to New York after that team had taken a thrashing down in its own section.

As a result, the patronage out at Grant field has been compelled to try to get itself all stirred up over Wake Forest, Oglethorpe, Davidson, Furman and Rutgers, which is a difficult job at best. But to New York after that team had taken a thrashing down in its own section.

As a result, the patronage out at Grant field has been compelled to try to get itself all stirred up over Wake Forest, Oglethorpe, Davidson, Furman and Rutgers, which is a difficult job at best. But to New York after that team had taken a thrashing down in its own section.

## Rule of Big Three Is Shattered East Figures on Conference

New York, October 30.—A suspicion is gradually dawning in the minds of some eastern football sharps that there are other teams, but eastern teams, other coaching systems than eastern systems and other good football players than those on the alleged "big three."

It has taken fifteen years, perhaps, to create the suspicion, and it may take fifteen more to convert the suspicion into realization, but the mere fact that the suspicion is there is the healthiest sign for the future of American college football.

Incidentally, tiring of attempting to dope out hypothetical "champion" teams in the east, some of the more radical members of the league have decided to establish a "conference" system, or some other form of football league that will do away once and for all with guessing which team is most justly entitled to the crown.

The east had scarcely recovered from the shock of seeing Chicago, the Golden Tornado and finally crushed the Georgia boys under a 28-7 score. Dartmouth went down into disaster in one of the most surprising games of the day, when Gill Doble's Cornell crowd swamped the Green team under a shower of touchdowns. The score was 59 to 7.

Yale had no difficulty in smothering Brown, and Princeton actually won a game against the Virginians, 34 to 0. But that doesn't mean anything.

**WOMEN TO PLAY  
IMPORTANT PART  
IN COUNTY POLITICS**

Sparta, Ga., October 30.—(Special.)—H. D. Chapman, tax collector of Hancock county and treasurer of the city of Sparta, in the last few days has been besieged by women applicants for registration. The women are anxious to have the election is Monday, October 31. This fact is taken to mean by old politicians that in county and city politics the women vote must be taken into consideration because it will evidently play an important part in the political campaigns to be waged next year.

The women of the city and county, it is said, are not at all pleased with the present political situation, and are determined to bring about a change in the fiscal affairs of both.

**WILSON VIRTUALLY  
WELL AFTER SLIGHT  
ATTACK SATURDAY**

Washington, October 30.—Former President Wilson had practically recovered today. It was said at his home, from the slight attack of indigestion which yesterday prevented

## A. P. REVIEW OF GRID WEEK

Centre college's well-earned victory over Harvard, which was gratifying to southern football followers as Penn State's crushing defeat of Georgia Tech was surprising, caught the popular interest in last week's football games, but, too, the play on Dixie gridirons held attention because of the varied attack of the modern game.

Georgia's elimination of Auburn from the list of southern teams unbeaten by another Dixie eleven proved to be a contest between two machines perfected in defense that neither backs could pierce until toward the close of the game. Quarterback Randall then hurled a long pass to Hartley and started the rally that enabled the Georgians to drive through the Auburn line in the remaining 15 yards and a 7-to-0 victory. Louisiana State used the aerial attack to turn its Alabama game into a tie, and Davidson tied with Richmond University by the same method.

The propelling of the oval through the air by the forward pass was not the only "air route" used, however, for players on two other teams showed their training in kicking field goals to advantage. Bemis, of Washington and Lee, booted one for a strong victory over Virginia Polytechnic Institute, while neither side could score by straight football, and Lowe, of North Carolina University, enabled his team to win from Maryland, 16 to 7, by three perfectly executed goals.

Tulane made one field goal in its game with Detroit University, and the New Orleans team forced the Michigan eleven to extend itself to the limit to win 14 to 10. Virginia University, the other southern team to engage in an intersectional match, did not fare so well, for Princeton's machine overran the Old Dominion eleven for a 30-to-0 victory.

The week also marked the steady improvement of Vanderbilt, whose triumph over Texas was followed Saturday by a 14-to-0 victory over Tennessee, which had given Dartmouth a terrific struggle the day the Commodores played the University of Texas.

Sewanee wiped out last year's tie with Kentucky State by a 20-to-0 victory. V. M. I. and the Carolina State added to the list of the season's tie games; South Carolina from Clemson, 21 to 0, and Mississippi from Mississippi University, by the same score. Florida rolled up a 24-to-0 victory over Howard, making as good a showing over the Alabama eleven as had some of the strongest teams to meet it. Furman played an even game with Georgia Tech, defeating the Citadel, defeating the cadets 42 to 0.

**ROME CITIZENS DEMAND  
LAW ENFORCEMENT**

Rome, Ga., October 30.—(Special.)—Two thousand men and women gathered at the City Auditorium this afternoon to protest against bootlegging and other crimes now prevailing here and adopted strong resolutions demanding better enforcement of the laws.

Many speakers stressed the drinking of whiskey by men high in the city's civic life, who encouraged the trade in whiskey. Rev. Herbert P. Joyner, pastor of the Maple Street Baptist church, created a sensation by declaring that a 16-year-old girl had been approached by an official of the Rome judicial circuit last week while he was under the influence of whiskey, with doubtful prospects.

City Recorder Ben Yancey declared that he is reluctant to impose severe penalties on ignorant car shooters, chiefly negroes and whites of low social strata, while the so-called "big game" is being played on bridge and in other ways.

Ex-Solicitor-General Claude Proctor defended the courts and asserted that the fault lies with the respectable element which indulges in drinking parties and yet expects "some poor dervish" to be sent to the chancery when found with half a pint of whiskey. The meeting was full of excitement at times, created by the plain talk of the speakers, pledging co-operation to officers in the enforcement of law were circulated and numerous signed.

**DRIVE AGAINST CANCER  
TO OPEN THIS MORNING**

All forces, medical, civic, educational and religious, in the United States will join this week in a general campaign against the cancer malady. This morning the local chapter of the American Red Cross will discuss the subject. Tuesday night at 8 o'clock all nurses of Atlanta will meet in the assembly hall of Grady hospital for a similar meeting.

The question of cancer and its control will be discussed during the week at the regular meetings of the Civitan, Rotary, Kiwanis, Lions, Masonic and other clubs. Medical societies will hold special meetings to talk on the disease, and the various religious organizations will take up the subject.

It is said that 10 per cent of persons in this country over 40 years of age die of cancer. The main point to be impressed this week is the fact that the disease, if treated in its infancy, can be cured.

The national cancer week movement was started by the American Society for the Control of Cancer last January. Dr. Charles A. Fowles, president of Denver, Colo., suggesting the observance of the week. Cancer week extends from October 30 to November 5.

Japanese widows designate themselves by the arrangement of their hair, and also signify whether they desire to marry again.

New York theatrical agencies report more stage women out of employment at the present time, than for many seasons past.

## Georgetown Confident of Taking Tech's Measure Here on Nov. 12

### JUDGE HINES ACCEPTS SUPREME COURT PLACE

Judge James K. Hines, one of the foremost lawyers in Georgia, announced Sunday night that he will accept the appointment as a member of the Georgia supreme court by Governor Thomas W. Hardwick.

Judge Hines will retire as associate justice of the supreme court January 1, 1922, and Judge Hines will then be sworn in as his successor.

In announcing that he would accept the appointment as supreme court justice Judge Hines stated he would immediately resign as special counsel for the state railroad commission, a position he has held for several years and also would relinquish other legal connections he has in his law practice.

Judge George announced Saturday he would retire as supreme court justice in order to devote his full time to looking after his business interests in south Georgia. He will return to his old home at Vienna in January.

Since 1891 Judge Hines has practiced law in Atlanta. He is a member of the law firm of Hines, Hardwick & Jordan, his partners being Governor Thomas W. Hardwick and Captain James K. Jordan. Captain Jordan is a nephew of Judge Hines.

Judge Hines was born in Burke county in 1852. In 1860 his family moved to Washington county. Later he was admitted to the bar at Savannah and moved to Sandersville. He was a graduate of the law college. He served as solicitor-general of his circuit; as judge of his circuit, several terms in the state legislature and since 1907 as special counsel for the state railroad commission.

### Plan To Make Monroe Banner Peach County

Folsyth, Ga., October 30.—(Special.)—"We are determined to make Monroe county one of the banner peach counties of Georgia" is the statement of leading growers of this county, which is backed up by an interest and enthusiasm that will not stop short of definite results. It is expected that at least 1,000 acres and perhaps more will be planted to peaches this fall and winter, orders for hundreds of trees having already been placed. Others are becoming converted to the slogan of "peaches and prosperity," and there is no telling just what the final acreage will be.

The plan planted two years ago will begin to bear next season. Inquiries are coming in from interested parties desiring to buy land to plant orchards. Others want to engage in the industry on a 50-50 basis. This means that Monroe county has already attracted attention from peach-growing sections. A boost for the growing of peaches in this section is the organization of the Middle Georgia Orchards company, a \$50,000 concern now seeking incorporation. This company will plant a large acreage in Monroe and Butts counties, according to members of the syndicate.

Members of the company seeking a charter are J. B. Carmichael, S. B. Kindred, J. Guthrie and V. M. White, all of Jackson. Splendid shipping facilities will be provided by the Southern Railway system, which has heretofore made a good record in handling fruits and vegetables. The Jackson, Perryville, Jenkinsburg and Juliette territory, located on the main line of the Southern, will have no cause to worry about prompt shipments of all the peaches and berries that Monroe and Butts counties have been growing in the last three years. A drive for more peaches was put on in the summer of 1913, but the high price of cotton at that time threw a damper on the movement. Revival of interest was shown the past spring and summer when scores of growers made trips to the heart of the peach belt.

**Boil Weevil.**  
A convincing argument for the growing of peaches is the presence of the boll weevil. With that insect wrecking the hopes of the cotton farmers, it is evident that some other dependable money crop must be found. Farmers believe that peaches suggest an adequate remedy for the weevil. It is admitted by every authority who has investigated the matter that Monroe and Butts counties are suited by climate and soil to the culture of a superior quality of peach. Here the fruit grows a little larger, has better flavor, a better color and all the qualities that make the Georgia peach the envy and admiration of the rest of the world.

**CAMPAIGN PLANNED  
FOR DAIRYING  
IN BUTTS COUNTY**

Jackson, Ga., October 30.—(Special.)—The Butts County Dairymen's association is planning a county-wide campaign in the interest of dairying and will have a meeting next Friday. Since the first of September, when a sour cream station was opened in Jackson, dairymen have grown to be the second largest industry in the county. Four cream and milk to the value of some \$20,000 per year is being shipped at present. It is hoped to bring the total up to several hundred thousand within the next few months.

Farmers who have engaged in dairying, either on a sour cream or whole milk basis, are finding the business satisfactory and profitable. Some farmers report profits of \$10 per cow per month, while others average \$5 and \$6 per cow each month.

### Irishmen Believe They Have Golden Opportunity to Get Revenge on Golden Tornado.

Washington, October 30.—(Special.)—Flushed with their recent victory over the strong Holy Cross team and still riding on the crest of the wave since their defeat of George Washington Saturday, Coach Al Brenneke's Georgetown giants are pointing to the season's greatest contest with Georgia Tech in Atlanta November 12.

With the greatest team in many months, a giant line, and a backfield in which even the incomparable Johnny McQuade is in a par with his running mates, the big Blue and Gray team has tasted victory in every start and does not intend to stop with the Golden Tornado.

Even the tactics of the old Irish end, who have fallen into the habit of predicting victory and every other night mass meetings of as high as 2,500 students are held with the "Rambling Wreck" the only topic of discussion. Gloom settled temporarily over the entire team after the loss of the Irishmen when Bill Gorgin, the 187-pound tackle, and Joe O'Connell, the 187-pound end, were injured in the annihilation of Holy Cross. Both players, however, are fast coming around and will be in the best of condition a week before the Georgia Tech contest.

**Good Feeling Toward Tech.**  
The outstanding feature of the several mass meetings has been the extreme cordiality always in evidence from the southerners. Referring to the kind of opposition Georgetown might expect in Atlanta, Ray Vincent McDonough, the popular faculty director of athletics, mentioned the daring feat of "Red" Barton last spring when he dived into the broken bleachers at Georgetown for a long fly. Barton, who endeared himself to the fighting Irishmen by his marvelous bit of daring in the Georgetown-Georgia Tech baseball game, received a great round of applause when Father McDonough finished his tribute.

In the contest with Holy Cross the team that only a few weeks ago outwrestled Harvard in the stadium, Georgetown's great ends, Florence, the western flash, and O'Connell, threw Gagnon and Simeonoff for a loss time and again. Outside of one nine-yard gain by the brilliant Gagnon, Holy Cross was not able to make a single gain of over three or four yards, while Flavin, McQuade and Kenyon skirted through the Purple line and kicked the ends at will.

**McQuade in Form.**  
First it was Flavin for end runs averaging 40 yards in three attempts, then Kenyon, and to cap the climax, the old Irishman Johnny McQuade to his old bucks of ten yards at a time. McQuade, since his year's absence from the line-up, has been rounding into shape rather slowly, but the Holy Cross game revealed the old matter at the height of his old-time glory.

With McQuade ranking as he does with the greatest of the old stars in Georgetown football annals, the fact that even he is having a hard time to keep up with Kenyon and Flavin is regarded by Georgetown supporters as the greatest indication of the giant strength extending will hurl against Alexander November 12 at Atlanta.

### TECH-PENN GAME TO BE SHOWN HERE ON RIALTO SCREEN

Announcement was made Sunday that moving pictures of the football game between Tech and Penn State played Saturday at the Polo grounds, New York, will be shown all this week at the Rialto theater, as a special added attraction to the regular bill at that theater.

In the picture will be shown the Tech team when it made the first touchdown, the Penn State making its touchdown, the brilliant runs of Killinger, of Penn State; several brilliant plays by Tech stars; the large crowd attending the game; and all other details of the big match.

The pictures take up a full reel of film, and will be run at every performance during the week. The pictures were taken Saturday afternoon, and were developed and shaped up ready for showing record time.

The regular bill includes Paul Frederick in "The Sting of the Lash," and the Tech football pictures are an added attraction.
